Rationale and key rating drivers

CARE Ratings Limited (CARE Ratings) has revised the rating of the Series A1 PTC by Marigold 08 2023, backed by microfinance loans receivables originated by Spandana Sphoorty Financial Limited (SSFL), at 'CARE AA (SO)' (pronounced as Double A [Structured Obligation]).

Revision in ratings is primarily based on performance of the underlying loans in the last 12 months post-securitisation, robust legal structure, well-defined payment mechanism, significant build-up in cash collateral (CC) and over collateral (OC) – as a percentage of the balance amount of pass-through certificates (PTCs), subordination of excess interest spread (EIS), servicing capability and SSFL's overall performance.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors - Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Delinquencies (90+ DPD as % of initial POS) of <2% and the sustained high collection efficiency (cumulative collection efficiency of >98%).

Negative factors - Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Delinquencies (90+ DPD as % of initial POS) of >5% and the sustained lower collection efficiency (cumulative collection efficiency of <90%).
- Deteriorating credit profile of the originator.
- Utilisation of cash collateral.
- Non-adherence to key transaction terms envisaged at the time of rating.

Analytical approach

The rating action is based on inter alia, observed and expected performance of pool, presence of credit enhancement (CE) and adherence to the transaction structure.

Pool Performance:
The pool has amortised by 74% in 12 months post-securitisation, with nil utilisation of CC. The pool has exhibited moderate delinquencies. As on August 2024, overdue (OD) (as a percentage of the initial principal outstanding [POS]) is 0.95%. CE available is sufficient to sustain the rating for balance tenure.

Pool summary (as on August-24 payout)	
Months post-securitisation	12
Pool amortisation	74.16%
30+ delinquency (percentage of the initial pool POS)	3.40%
90+ delinquency (percentage of the initial pool POS)	1.63%
Overdue amount (percentage of the initial pool POS)	0.95%
Cumulative Collection Efficiency [CCE]	98.20%
CC (percentage of the balance PTC POS)	50.49%
Cumulative prepayments	13.91%

Detailed description of key rating drivers

Key strengths:

- CC as a percentage of PTC POS is 50.49%, which remains unutilised, and OC, which is 63.09% of PTC POS.
- The pool has performed on expected lines for 12 months (post-securitisation) and has amortised 74.16%.
- Well-defined payment mechanism and adherence to the transaction structure.

Key weakness:

- Moderate delinquency with OD of 0.95% and 90+DPD at 1.63% (both as a percentage of initial pool POS).
- Weak borrower profile, as this segment is susceptible to socio-political interference and other external shocks.

Liquidity: Strong

Inherent liquidity in the structure is strong. Interest payouts for Series A1 PTCs are promised monthly while the principal of Series A1 PTC is promised to be paid on or before the final legal maturity. The investors in Series A1 PTC may expect principal repayment monthly per the agreed waterfall mechanism. In case of delinquency, payouts are expected to be supported by CC (in the form of fixed deposits [FDs]), OC, and EIS.

Key rating assumptions

CARE Ratings has analysed the transaction to assess whether CE is sufficient to cover shortfalls. Since the transaction is sensitive to credit quality of the underlying pool, CARE Ratings has analysed performance of the pool and overall portfolio performance of the originator. Considering borrower profile and loan, pool characteristics and portfolio performance, CARE Ratings has taken the average shortfall from 7% to 9% of the principal outstanding. Base case shortfalls were stressed and other key factors such as timing of shortfalls, recovery assumptions, and time to recovery. CARE Ratings has found that CE provided is sufficient to cover shortfalls in a stress scenario commensurate with the assigned rating. The pool cash flow has been further adjusted for prepayments of underlying loans, assuming monthly prepayments in the range of 0.5%-1.00%.
