September 04, 2026

Vivriti Capital Limited: Ratings confirmed as final for PTCs backed by unsecured personal loan receivables (originated under co-lending partnership) securitisation transaction

Summary of rating action

Trust name	Instrument*	Current rated amount (Rs. crore)	Rating action	Financial sector regulator #
Daisy 05 2026	Series A1 PTC	75.00	[ICRA]AA-(SO); provisional rating confirmed as final	RBI
	Series A2 PTC	4.31	[ICRA]A-(SO); provisional rating confirmed as final	RBI

**Instrument details are provided in Annexure I*

#SEBI's grievance redressal/dispute resolution and SEBI investor protection mechanisms such as SCORES and ODR shall not be available for activities and instruments which fall under the regulatory purview of Financial Sector Regulators other than SEBI

Rationale

ICRA had assigned provisional ratings to the pass-through certificates (PTC) issued by Daisy 05 2026 under a securitisation transaction originated by Vivriti Capital Limited {VCL/Originator[1]; rated [ICRA]A+ (Stable)[2]. The PTCs are backed by a pool of unsecured personal loan receivables originated by VCL with an aggregate principal outstanding of Rs. 86.21 crore (pool receivables of Rs. 105.5 crore). VCL would also act as the servicer for the transaction.

Since the executed transaction documents are in line with the rating conditions and the legal opinion for the transaction has been provided to ICRA, the said rating has now been confirmed as final.

Pool performance summary

Parameter	Daisy 05 2026
Payout month	August 2026
Months post securitisation	2
Pool amortisation	17.33%
Series A1 PTC amortisation	23.67%
Series A2 PTC amortisation	0.00%
Cumulative prepayment rate	5.99%
Cumulative collection efficiency[3]	98.98%
Loss-cum-0+ days past due (dpd)[4]	2.23%
Loss cum 30+ dpd[5]	0.69%
Loss cum 90+ dpd[6]	0.00%
Cumulative cash collateral (CC) utilisation	0.0%

[1] *Erstwhile Hari and Company Investments Madras Limited*
[2] *The current rating rationale of the originator, available at this link, provides its detailed rating history and rating transitions.*
[3] *Cumulative collections till date including advance collections but excluding prepayments / Cumulative billings till date*
[4] *Principal Outstanding (POS) on contracts aged 0+ dpd + Overdues / Initial POS on the pool*
[5] *POS on contracts aged 30+ dpd + Overdues / Initial POS on the pool*
[6] *POS on contracts aged 90+ dpd + Overdues / Initial POS on the pool*

Transaction structure

As per the transaction structure, Series A2 PTC is subordinate to Series A1 PTC. During the tenure of Series A1 PTC, the collections from the pool will be used to make the promised interest payouts and the expected principal payouts (to the extent of principal billed) to Series A1 PTC. Post the maturity of Series A1 PTC, the payout to Series A2 PTC (interest payouts on promised basis and principal payouts to Series A2 PTC) will be on expected basis, which will be due and payable only on the final maturity date. The final maturity date for Series A1 PTC and for Series A2 PTC is October 12, 2030. The collections from the pool, after making the promised interest payouts to Series A1 PTC, will be used to make the expected principal payouts to Series A1 PTC. This principal payment, though, is not promised and any shortfall in making the expected principal payment to Series A1 PTC would be carried forward to the subsequent payout.

All prepayment amounts would be passed on to Series A1 PTC (till the Series A1 PTC principal is not fully amortised) every month and its future payouts will be revised accordingly. The entire principal repayment to Series A1 PTC and Series A2 PTC is promised on the scheduled maturity date. The residual cash flows from the pool, after meeting the promised and expected payouts, will be used for the prepayment of Series A1 PTC principal and for prepayment of Series A2 PTC principal once Series A1 PTC is fully amortised.

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 5.00% of the initial pool principal, amounting to Rs. 4.31 crore, provided by the Originator, (ii) subordination of 13.00% of the initial pool principal for Series A1 PTC and 8.00% of the initial pool principal for Series A2 PTC, and (iii) the EIS of 16.81% and 15.96% of the initial pool principal for Series A1 PTC and A2 PTC, respectively.

Key rating drivers and their description

Credit strengths

Granular pool supported by presence of credit enhancement – The pool is granular, consisting of 6,977 contracts, with top 10 obligors forming only 0.54% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of CC and EIS would absorb some of the losses in the pool and provide support in meeting the PTC payouts.

Seasoned contracts in the pool with no overdues – The pool has a weighted average seasoning of ~7 months with no delinquent contracts as on the cut-off date. Further, all of the contracts in the pool have never been delinquent, thereby reflecting the borrowers' relatively better credit profile, which is a credit positive.

Track record of co-lending operations – VCL has a record of over three years of co-lending in the unsecured personal loans category. The partners have adequate underwriting policies and collection procedures across a wide geography. The company has adequate processes for servicing the loan accounts in the securitised pools. The collections are carried out entirely in the digital mode which significantly reduces the comingling risk with the co-lending partners.

Credit challenges

Moderate geographical concentration – The pool has moderate geographical concentration with the top three states, viz. Maharashtra, Karnataka and Uttar Pradesh contributing ~38% to the initial pool principal. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Risks associated with lending business – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The pool is exposed to the inherent credit risk associated with the unsecured nature of the asset class and that recovery from delinquent contracts tends to be lower.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 6.00% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 4.8% to 18% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final ratings for the instruments.

Details of key counterparties

The key counterparties in the rated transaction are as follows:

Transaction Name	Daisy 05 2026
Originator	Vivriti Capital Limited
Servicer	Vivriti Capital Limited
Trustee	Catalyst Trusteeship Limited
CC holding Bank	DCB Bank
Collection and payout account Bank	ICICI Bank Limited

Liquidity position

For Series A1 PTC - Strong

The liquidity for Series A1 PTC is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~5.00 times the estimated loss in the pool.

For Series A2 PTC - Strong

The liquidity for Series A2 PTC is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~4.25 times the estimated loss in the pool.

Rating sensitivities

Positive factors – The ratings could be upgraded on the strong collection performance of the underlying pool (monthly collection efficiency >95%) on a sustained basis, leading to the build-up of the credit enhancement cover for the remaining payouts.

Negative factors – Pressure on the ratings could emerge on the sustained weak collection performance of the underlying pool (monthly collection efficiency of <90%), leading to higher-than-expected delinquency levels and credit enhancement utilisation levels. Weakening in the credit profile of the servicer (VCL) could also exert pressure on the ratings.

Analytical approach

The rating action is based on the trustee confirming compliance with the terms of the transaction and the executed transaction documents being in line with the terms initially shared with ICRA.

About the originator

Pursuant to the composite scheme of arrangement between HCIMPL, VCL, VNL, VAM and VFPL, which became effective from April 1, 2026, VCL's NBFC business was transferred to HCIMPL. HCIMPL was renamed to Vivriti Capital Limited on June 13, 2026.

VCL was a registered non-deposit taking systemically important non-banking financial company (NBFC-ND-SI), promoted by Mr. Vineet Sukumar and Mr. Gaurav Kumar in June 2017. It provided diverse debt financing solutions including loans, working capital finance and trade finance to NBFCs and other enterprises across sectors including manufacturing, infrastructure and financial services. It also expanded its presence in the retail segment through various co-lending partnerships with other NBFCs.

In FY2026, VCL reported a net profit of Rs. 264 crores, on a standalone basis, on total managed assets of Rs. 13,162 crores while it reported a net profit of Rs. 220 crores on total managed assets of Rs. 10,868 crores in FY2025.

Complexity level of the rated instrument

Instrument	Complexity indicator
Series A1 PTC	Highly Complex
Series A2 PTC	Highly Complex

The Complexity indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click here]
