Bank loan facilities	RBI	-	-	-	68500	IND AA-/Positive	Affirmed

*Details in Annexure

Analytical Approach

Ind-Ra continues to take a standalone view of SKF to arrive at the ratings.

Detailed Rationale of the Rating Action

The ratings reflect SKF's adequate capitalisation levels for scaling up the franchise in the medium term, supported by steady internal accruals, a reduction in the cost of funding, and the management of asset quality. The ratings factor in the improvement in operational efficiency over the years, leading to a moderation in the operating expenses, supporting cost metrics with healthy portfolio growth.

The ratings benefit from the experience of its promoters and management team, along with improving geographical diversification. Ind-Ra believes SKF's expansion will be further supported by an equity raise through a resubmission for an initial public offer (IPO).

However, the ratings remain constrained by the category of customers, with the company's financially vulnerability to seasonality and business cycles.

List of Key Rating Drivers

Strengths

- Expansion in franchise and levers in place to further increase scale
- Strengthened capital buffers
- Maintained adequate profitability
- Diversified funding profile
- Experienced management backed by marquee investors

Weaknesses

- Financially vulnerable borrower segment, but manageable asset quality across business cycles

Detailed Description of Key Rating Drivers

Expansion in Franchise and Levers in Place to Further Increase Scale: SKF's assets under management (AUM) rose around 18.9% yoy to INR162.3 billion at end-1QFY27 (FY26: INR157.5 billion; FY25: INR132.6 billion;; FY24: INR104.8 billion), led by an increase in the number of branches over the years to 704 (707; 648; 579; 447) and an improvement in the AUM per branch to INR230.5 million (INR222.8 million; INR204.6 million; INR181 million; INR165 million). SKF has been expanding its presence to new states over the past few years. The company started its operations in Himachal Pradesh and Uttarakhand in FY22 and in Uttar Pradesh and Karnataka in FY24. With its entry into Telangana with eight branches during FY26, its presence increased to 13 states and union territories.

SKF primarily engages in the financing of used vehicles and secured micro, small and medium enterprises (MSME), with portfolio historically being concentrated in Rajasthan; however, its share of AUM from the state reduced to 44% in 1QFY27 (FY26: 45%; FY25: 47%; FY24: 52%). Ind-Ra believes SKF will continue to diversify. Also, in line with the stated strategy, SKF forayed into the prime segment in 1QFY27 and continued to grow its existing portfolio in vehicle financing and MSME lending. The MSME-secured portfolio declined to 22.1% in 1QFY27 (FY26: 22.8%; FY25: 24.4%; FY24: 20.9%; FY23: 16%) due to pressure in the overall operating environment in Tier-III and below categories. The largest part (72.3%) of the portfolio had a ticket size of less than INR0.8 million in 1QFY27, with an average ticket size of about INR0.4 million. Within the total AUM, the off-book portion was around 13.5% in 1QFY27 and SKF plans not to go beyond 15%. Ind-Ra believes SKF has adequate equity buffers supported by internal accruals to grow around 18% to 20% annually over the medium term, while maintaining manageable asset quality and continued geographic diversification; this is a key rating monitorable.

Strengthened Capital Buffers: At end-June 2026, SKF had a total tangible equity base of INR40.48 billion (FY26: INR39.61 billion; FY25: INR34.79 billion; FY24: INR30.75 billion). Its tier I capital adequacy ratio was 25.98% in 1QFY27 (FY26: 25.41%; FY25: 29.51%; FY24: 33.86%) and leverage (debt/tangible equity) was 3.19x (3.24x; 3.34x; 2.91x). SKF has attracted investments from marquee private equity firms, with equity infusions of INR9.55 billion in FY24 (FY22: INR4.65 billion; FY20: INR2.35 billion). The company shelved its IPO, citing prevailing market conditions, valuation considerations, and subdued investor sentiment. However, the company plans to reassess the plan once the external environment becomes more conducive. The agency expects the company to raise fresh issuance of equity through the IPO which will further strengthen the capital buffer for absorbing any asset quality shock and would also provide support to meet its planned growth while maintaining a moderate leverage. The agency expects SKF to maintain comfortable equity buffers, with a leverage (debt/ tangible equity) of less than 4x in FY27 and over the medium term.

Maintained Adequate Profitability: SKF reported a profit after tax of INR1,043 million in 1QFY27 (FY26: INR4,309 million; FY25: INR3,797 million; FY24: INR3,119 million), with a return on average assets of 2.42% (2.65%; 2.74%; 2.93%). While its yields declined, the profitability was sustained, supported by a lower cost of funding, operating expense optimisation, and manageable asset quality. SKF operates in a high-risk, adjusted pricing segment, offering a healthy return profile at this scale and has entered the prime segment in FY27. The company's opex-to-average AUM declined to 5.31% in 1QFY27 (FY26: 5.62%; FY25: 5.83%; FY24: 5.96%). Its credit cost (provisions and write-offs to average AUM) increased to 3.2% in 1QFY27 (FY26: 2.25%; FY25: 2.01%; FY24: 1.34%), due to pressure in the operating environment. The rise in increased credit costs was due to adverse weather patterns and prevailing operating environment; however, the management expects the credit costs to normalise over the coming quarters. Ind-Ra expects SKF to sustain profitability in the near term, supported by operating efficiency and the ability to grow its loan book.

Diversified Funding Profile: The company's diversified funding profile comprised term loans and cash credit facilities from banks and financial institutions (about 42%), non-convertible debentures/other capital market instruments (about 22%), securitisation transactions (30%) and external commercial borrowings (6%) at FYE26. The company had a diversified borrowing profile, stemming from its relationships with around 60 lenders. SKF has also been able to mobilise funds at competitive rates, and the blended cost of borrowings reduced to 8.6% in 1QFY27 (FY26: 9.16%; FY25: 9.46%; FY24: 9.35%). The management expects to manage the overall profitability through operational efficiency and managing asset quality, which will offset the impact on net interest margin, which may be affected by a decline in average yield and an increase in the average cost of funds in FY27.

Experienced Management Backed by Marquee Investors: SKF has almost three decades of operating track record and

a considerable presence in Rajasthan, which accounted for 44% of AUM as on 30 June 2026 due to the legacy market. The company has seen multiple cycles, and its top management consists of professionals with significant and relevant experience. SKF has strengthened its information technology and management of information systems, and has benefited from the high involvement of key institutional investors such as Norwest Venture Partners X – Mauritius; TPG Growth IV SF; Baring Private Equity India AIF; Evolvence India Fund; and 360 ONE Special Opportunities Fund, among others, who together held a 62.34% stake in SKF as on 30 June 2026. SKF's board of directors comprises the promoter as its managing director, a whole-time director, a non-executive director, three independent directors and one investor nominee director.

Financially Vulnerable Borrower Segment, but Manageable Asset Quality across Business Cycles: The company's AUM mix for offered products comprised of commercial vehicles (36.9%), cars (25.4%), tractors (12.2%), two-wheelers (3.4%) and MSME (22.1%) at 1QFYE27. The company has a healthy presence in the northern market as a used vehicle lender, with over 74% of its vehicle portfolio dedicated to financing pre-owned vehicles. SKF's borrowers are susceptible to economic shocks and have limited income buffers, as it primarily lends to individual borrowers in the used vehicle financing segment and to small business owners in the MSME segment, mainly in the rural and semi-urban markets. Thus, delinquencies in the softer buckets have remained high and volatile and its 90+ days past due increased to 3.7% in 1QFY27 (FY26: 3.2%; FY25: 2.1%; FY24: 1.8%) and its bad debt written offs (net of recoveries) remained high at INR1,581 million in FY26. The company's gross non-performing assets (NPA) as per income recognition, assets classification by the Reserve Bank of India's norms increased in 1QFY27; however, it managed to keep the delinquencies under check along with maintaining adequate provision coverage of 36.2%. Ind-Ra believes growth while maintaining asset quality will remain a key rating monitorable.

Liquidity

Adequate: SKF had a positive cumulative surplus in all time buckets, as per the structural liquidity statement for September 2026. The company has an average asset tenor of around four years, which is adequately matched with the average liability tenor. It also maintained sanctioned and undrawn bank lines (cash credit/ working capital demand loan) of INR0.8 billion from various banks as of September 2026. The on-balance sheet liquidity (liquid investments and unencumbered cash and investments) stood at INR14.5 billion, against a scheduled debt repayment of INR12.5 billion over October-December 2026. The management maintains a policy to keep minimum surplus liquidity for the next two months' debt repayment and operating expenses adjusting for the expected collections on a rolling basis. The company can also raise liquidity through the securitisation of its portfolio. Even under Ind-Ra's stress case, which assumes a delay in inflows, the liquidity profile is reasonable.

Rating Sensitivities

Positive: Continued and significant growth in the scale of operations, continued geographic diversification, sustained profitability, continued improvement in funding profile and cost of funding relative to peers' and a demonstrated ability to manage and grow its asset quality could lead to a positive rating action.

Negative: Events that could, individually or collectively, lead to a negative rating action are:

- deterioration in the asset quality and high credit costs, resulting in a material capital impairment
- the leverage exceeding 4.0x, on a sustained basis, over the medium term
- challenges in mobilising funds and an inability to maintain adequate liquidity

Any Other Information

Not applicable

ESG Issues

ESG Factors Minimally Relevant to Rating: Unless otherwise disclosed in this section, the ESG issues are credit neutral or have only a minimal credit impact on SKF, due to either their nature or the way in which they are being managed by the entity. About India Ratings

India Ratings and Research (Ind-Ra) is India's SEBI registered credit rating agency committed to providing India's credit markets accurate, timely and prospective credit opinions. Built on a foundation of independent thinking, rigorous analytics, and an open and balanced approach towards credit research, Ind-Ra has grown rapidly during the past decade, gaining significant market presence in India's fixed income market.

Ind-Ra currently maintains coverage of corporate issuers, financial institutions (including banks and insurance companies), finance companies, urban local bodies, and structured finance and project finance companies.

Headquartered in Mumbai, Ind-Ra has seven branch offices located in Ahmedabad, Bengaluru, Chennai, Gurugram, Hyderabad, Kolkata and Pune. Ind-Ra is recognised by the Securities and Exchange Board of India and the Reserve Bank of India.

Ind-Ra is a 100% owned subsidiary of the Fitch Group.

Solicitation Disclosures

Additional information is available at www.indiaratings.co.in. The ratings above were solicited by the issuer, and therefore, India Ratings has been compensated for the provision of the ratings.

Ratings are not a recommendation or suggestion, directly or indirectly, to you or any other person, to buy, sell, make or hold any investment, loan or security or to undertake any investment strategy with respect to any investment, loan or security or any issuer.

DISCLAIMER

India Ratings and Research Private Limited (India Ratings) is a private limited company registered under the provisions of the Companies Act, 1956, having CIN U67100MH199SFTC140049, and registered office at Wockhardt Towers, 4th Floor, West Wing, Bandra Kurla Complex, Bandra East, Mumbai, Maharashtra, 400051, India. The contact details of India Ratings are Telephone No.: +91 22 4000 1700 and Fax. No.:

+91 22 4000 1701. India Ratings is registered with the Securities and Exchange Board of India (SEBI) as a Credit Rating Agency under Section 12 of the SEBI Act, 1992, having SEBI Registration Number IN/CRA/002/1999.

India Ratings and Research Private Limited (India Ratings) is a Credit Rating Agency registered with the Securities and Exchange Board of India (SEBI) under Section 12 of the SEBI Act, 1992. In this capacity, India Ratings undertakes ratings of listed and proposed to be listed instruments that fall under the regulatory oversight of SEBI. In addition, in line with Regulation 9(f) of the SEBI (Credit Rating Agencies) Regulation, 1999, India Ratings rates financial instruments falling under the purview of other financial sector regulators (FSR). Instruments which come under the purview of other FSRs do not come under the overall governance of SEBI. Issuers/Users/readers of this communication/report are, therefore, cautioned to know the risks involved in dealing in such instruments. Such instruments can carry Liquidity and Price Risk which pertains to how saleable a Security is in the market. If a particular Security does not have a market at the time of sale, then the Investor's investments may have to bear an impact depending on its exposure to that particular Security. It is not possible to predict if, and to what extent, a secondary market may develop in the debt securities or at what price the debt securities will trade in the secondary market or whether such market will be liquid or illiquid. The more limited the secondary market is, the more difficult it may be for holders of the debt securities to realise value for the debt securities prior to redemption of the debt securities. If the debt securities are unlisted, then the ability of the Investors to resell or trade them may be limited, leading to liquidity and price risk on the debt securities. The returns from a particular asset class may underperform returns from other asset classes. The changes in government policy in general and changes in taxation may impact the returns to investors. There can be external risks arising out of geopolitical situations which can lead to volatility in/impact the performance of the individual securities. Issuers/Users/readers are advised to note that SEBI’s investor protection mechanisms and SEBI’s grievance or dispute redressal mechanisms are not applicable to ratings assigned by India Ratings that fall under the purview of other FSRs. Should you have any grievance with instruments under the purview of other FSRs, please write to infogrp@indiaratings.co.in. For any grievance with instruments under the purview of SEBI, please write to investor.grievances@indiaratings.co.in.

All credit ratings assigned by India Ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: https://www.indiaratings.co.in/rating-definitions. In addition, rating definitions and the terms of use of such ratings are available on the agency's public website www.indiaratings.co.in. Published ratings, criteria, and methodologies are available from this site at all times. India Ratings’ code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the code of conduct section of this site.
