October 28, 2026

Aptus Finance India Private Limited: Rating reaffirmed for PTCs backed by loan against property (SME LAP loans) receivables securitisation transaction

Summary of rating action

Trust name	Instrument*	Initial rated amount (Rs. crore)	Amount O/s after last surveillance (Rs. crore)	Current rated amount (Rs. crore)	Rating action	Financial sector regulator#
NIMBUS 2023 Orakei	Series A1 PTC	95.62	40.45	19.27	[ICRA]AA(SO); Reaffirmed	RBI

**Instrument details are provided in Annexure I*

#SEBI's grievance redressal/dispute resolution and SEBI investor protection mechanisms such as SCORES and ODR shall not be available for activities and instruments which fall under the regulatory purview of Financial Sector Regulators other than SEBI.

Rationale

The pass-through certificates (PTCs) are backed by loan against property (SME LAP loans) receivables by Aptus Finance India Private Limited (AFIPL/Originator). AFIPL would be the servicer for the transaction.

The rating reaffirmation factors in the build-up of the credit enhancement cover over the future PTC payouts on account of healthy amortisation and pool performance being in line with expectations. The cash collateral (CC) is in the form of an unconditional and irrevocable corporate guarantee (CG) from AFIPL. The rating also draws comfort from the fact that the breakeven collection efficiency is lower compared to the actual collection level observed in the pool till the September 2026 payout month.

Pool Performance Summary

Parameter	NIMBUS 2023 Orakei
Payout month	September 2026
Months post securitisation	38
Pool amortisation	63.3%
Series A1 PTCs amortisation	79.9%
Cumulative collection efficiency[1]	99.4%
Cumulative prepayment rate	27.9%
Loss-cum-0+ dpd[2]	14.4%
Loss-cum-30+ dpd[3]	9.5%
Loss-cum-90+ dpd[4]	2.4%
Cumulative cash collateral (CC) utilisation	0.0%

[1] *Cumulative collections including advances / (Cumulative billings + Opening overdue at the time of securitisation*
[2] *Principal outstanding on contracts aged 0+ dpd / Principal outstanding on the pool at the time of securitisation*
[3] *Principal outstanding on contracts aged 30+ dpd / Principal outstanding on the pool at the time of securitisation*
[4] *Principal outstanding on contracts aged 90+ dpd / Principal outstanding on the pool at the time of securitisation*

Transaction Structure

According to the transaction structure, the loan pool receivables will be assigned at par to the PTC investors. As per the waterfall mechanism for the transaction, the monthly cash flow schedule comprises the promised interest payment to Series A1 PTC at the predetermined interest rate on the principal outstanding. The principal repayment to Series A1 PTC is promised on the last payout date.

The first line of support for Series A1 in the transaction is in the form of an OC/subordination of 6.00% of the pool principal. The excess interest spread (EIS) available in the structure will provide further credit enhancement for the transaction. The EIS (48.84% of the pool principal initially, based on the indicated PTC yield, for Series A1 PTC) will be utilised towards accelerated principal amortisation (to the extent of 38% of EIS) after paying the promised and scheduled payouts to the PTCs while the balance (62% of the EIS) will flow back to the originator. All prepayment amounts would be passed on to Series A1 PTC (till Series A1 PTC principal is not fully amortised) every month and future payouts will be revised accordingly. While the loans in the underlying pool are all fixed rate loans, the yield for Series A1 PTC is floating and linked to an external benchmark rate, thereby exposing the transaction to interest rate risk.

Key rating drivers and their description

Credit strengths

Build-up in credit enhancement available in the structure – The rating factors in the build-up in the credit enhancement with cash collateral increasing to 21.8% of the balance pool principal compared to 14.6% during previous surveillance. Internal credit support is also available through principal subordination of 48.36% and EIS of 36.87% of the balance pool principal.

Contracts backed by self-occupied residential properties – A major part of the pool backed by self-occupied residential properties. This is expected to support the quality of the pool as it has been observed that borrowers tend to prioritise repayments towards such loans even during financial stress.

Adequate servicing capability of the originator – The company has adequate processes for servicing of the loan accounts in the securitised pool. It has a demonstrated track record of over 9 years of regular collections across a wide geography.

Credit challenges

High geographical concentration – The pool has high geographical concentration with the top 3 states, viz. Andhra Pradesh, Tamil Nadu and Telangana, contributing 97% to the balance pool principal amount. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Moderate pool performance – The pool's performance has been moderate with a monthly collection efficiency of ~94% as of the September 2026 payout month. This has resulted in high delinquencies in the pool with the 0+ days past due (dpd) at 14.4%, however, the roll-forward to the harder buckets has remained contained with 90+ dpd at 2.4%.

Risks associated with lending business –The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans.

Exposed to Interest rate risk - The transaction is exposed to interest rate risk as the underlying pool has fixed rate loans, whereas yield on PTCs is floating (linked to DCB bank's external benchmark linked (EBLR) rate).

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayment in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 3.25% of initial pool principal with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 4.8% to 18.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final rating for the instrument.

Details of key counterparties

The key counterparties in the rated transaction are as follows:

Transaction name	NIMBUS 2023 Orakei
Originator	Aptus Finance India Private Limited
Servicer	
Trustee	Catalyst Trusteeship Limited
CG provider	Aptus Finance India Private Limited
Collection and payout account Bank	ICICI Bank

Liquidity position: Superior

The liquidity for Series A1 PTC is superior after factoring in the credit enhancement available to meet the promised payouts to the investor. The total credit enhancement would be more than 10 times the estimated loss in the pool.

Rating sensitivities

Positive factors – The rating can be upgraded on an improvement in AFIPL's credit profile along with healthy pool performance.

Negative factors – The rating for PTCs would be downgraded in case of deterioration in the performance of the underlying pool or in case of any deterioration in the credit profile of AFIPL.

Analytical approach

The rating action is based on the performance of the pool till August 2026 (collection month), the present delinquency levels and the credit enhancement available in the pool, and the performance expected over the balance tenure of the pool.

About the originator

Incorporated in December 2009, Aptus Value Housing Finance India Limited (Aptus) is a housing finance company headquartered in Chennai. The company's target borrowers are from the low to middle-income segments, with an average ticket size in the range of Rs. 9-9.5 lakhs (increased from Rs. 7-8 lakh earlier). The company's target geographies are the southern states, with a focus on rural and semi-urban areas. Aptus is largely focused on self-employed customers (about 80% of the total portfolio) without documentary evidence of their income, and limited access to funding from banks and larger HFCs. The company has adequate systems and processes to assess the income of borrowers. Aptus Finance India Private Limited (AFIPL) is a wholly owned subsidiary of Aptus. AFIPL extends mortgage loans to small and medium enterprises who are largely ignored by the formal financial ecosystem.

Aptus Finance India Private Limited (AFIPL) is a wholly owned subsidiary of Aptus. AFIPL extends mortgage loans to small and medium enterprises who are largely ignored by the formal financial ecosystem. While the target segment is largely the low income and self-employed category, a centralised credit appraisal mechanism and a conservative loan-to-value underpinned by prudent underwriting policies, mitigate the inherent risks to an extent. Aptus Finance's AUM was about Rs. 3912.34 crore as on June 31, 2026.

Complexity level of the rated instrument

Trust name	Instrument	Complexity indicator
NIMBUS 2023 Orakei	**Series A1 PTC**	Highly Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: Click here
