SEBI's grievance redressal/dispute resolution and SEBI investor protection mechanisms such as SCORES and ODR shall not be available for activities and instruments which fall under the regulatory purview of Financial Sector Regulators other than SEBI

Rationale

The ratings reflect NIIF Infrastructure Finance Limited's (NIIF IFL) track record of nil stage 2 and stage 3 loan assets since the commencement of operations in 2015. The ratings also factor in the strength of the company's diversified portfolio spread across renewable energy, transmission, transport & logistics, and other infrastructure sectors. Moreover, the ratings consider the relatively tighter regulatory framework for non-banking financial companies-infrastructure debt funds (NBFC-IDFs), necessitating investment/lending only to infrastructure projects with at least one year of satisfactory commercial operations and direct lending to toll-operate-transfer (TOT) projects. The ratings also factor in the company's strong liquidity position, aided by the regulatory restrictions on the proportion of short-term debt in the overall borrowing mix, the limited interest rate risk and the comfortable capitalisation profile supported by strong shareholders. NIIF IFL's capital-to-risk weighted assets ratio (CRAR) stood at 20.4% compared to the regulatory requirement of 15.0% while the gearing was 5.7 times as on June 30, 2026.

The ratings draw comfort from NIIF IFL's experienced management team, with expertise in infrastructure finance, and its adequate profitability indicators. Strength is also reflected in the key shareholders, i.e. National Investment and Infrastructure Fund II (NIIF II)/Strategic Opportunities Fund (SOF) with a 39.7% equity stake as on June 30, 2026 acting through its investment manager, i.e., National Investment and Infrastructure Limited (NIIFL), Aseem Infrastructure Finance Limited (AIFL; 30.8%) and the Government of India (GoI; 25.1%). NIIF IFL, vide its stock exchange filing dated July 06, 2026, intimated that its board has noted the proposed sale of AIFL's entire 30.8% stake in the company, comprising 42,39,32,487 equity shares, to NIIF SOF subject to regulatory approvals. ICRA notes that pursuant to the closure of the proposed transaction, NIIF SOF's stake would increase to 70.5%, followed by the GoI (25.1%) and HDFC Bank Limited (erstwhile Housing Development Finance Corporation Limited; 4.4%). The proposed transaction which would result in increase in the stake of NIIF SOF is not expected to impact the credit profile of NIIF IFL.

ICRA expects NIIF IFL to continue reporting good asset quality indicators while it grows its business volumes. Given the wholesale nature of the loans, concentration risk continues to remain relatively high. However, ICRA draws comfort from the

company's prudent underwriting norms as reflected by the good asset quality indicators, diversified portfolio and the tighter regulatory framework.

ICRA notes that the scope of lending and fund-raising options has been broadened for NBFC-IDFs by the Reserve Bank of India (RBI) over the years. The impact of the same on the loan and borrowing mix would be visible over the medium term. Also, the capital requirement (minimum Tier I capital requirement of 10%) and exposure norms (maximum permissible single party exposure capped at 30% and group exposure capped at 50% of Tier I capital compared with higher limits earlier) were revised earlier in FY2024. NIIF IFL is within the threshold for exposure limits and comfortably above the regulatory capital adequacy requirement. While portfolio vulnerability can increase as the scope of lending has been expanded and the tripartite agreement requirement being no longer applicable, the company's prudent underwriting and monitoring norms should help it manage the risk.

ICRA has reaffirmed and withdrawn the rating assigned to the Rs. 650-crore non-convertible debenture (NCD) programme as no amount is outstanding against the same. The rating has been withdrawn in accordance with ICRA's policy on the withdrawal of credit ratings.

The Stable outlook reflects ICRA's expectation that the company would continue to grow its business profitably, while maintaining good asset quality indicators and prudent capitalisation levels, supported by good shareholders.

Key rating drivers and their description

Credit strengths

Strong asset quality and experienced management team – NIIF IFL's portfolio grew by 25% year-on-year (YoY) to Rs. 31,782 crore as on March 31, 2026 from Rs. 25,390 crore as on March 31, 2025. Further, the portfolio grew by 17% (annualised basis) in Q1 FY2027 to Rs. 33,137 crore as on June 30, 2026. The energy generation segment had the highest share in the portfolio at 64.9% as on June 30, 2026, followed by transport and logistics (19.7%), communication (8.3%), power transmission (4.2%), water/sanitation (1.6%), and social/commercial infrastructure sector (1.3%). The exposure to the power sector primarily comprises the renewable energy project. As per the board-approved risk and environmental, social, and governance (ESG) policies, NIIF IFL has integrated environmental and social (E&S) risk assessment and mitigation in the lending process.

The regulatory framework for NBFC-IDFs necessitates lending/investment only in infrastructure projects with at least one year of satisfactory commercial operations and direct lending to TOT projects. Hence, construction and execution risks are nil and operating risk is low due to the track record of operations. Nevertheless, ICRA notes that the absence of tripartite agreements would expose NBFC-IDFs to the risk associated with the project in the event of termination. It is also noted that the current portfolio has a significantly higher weighted average seasoning of operations, i.e., around seven years against the regulatory minimum of one year. The adequacy of the company's project appraisal and monitoring processes and the lower risks compared to under-construction projects have been demonstrated by the nil stage 2 and stage 3 assets. NIIF IFL mitigates the risk of dependence on promoters by including a right to change the operations & maintenance (O&M) operator of the borrower. However, given the wholesale nature of the loan book, the portfolio remains vulnerable to lumpy slippages in the asset quality. In this regard, ICRA notes that NIIF IFL's provision cover of ~0.6% as on June 30, 2026 for the entire portfolio is higher than the regulatory requirement of 0.4%.

The ratings draw comfort from the experienced senior management team with considerable expertise in the infrastructure financing space. The company has robust underwriting and risk management systems, processes and policies, as evidenced by the strong asset quality. It is expected to follow prudent policies while increasing the scale of operations with sectoral diversification.

Comfortable capitalisation profile supported by strong shareholders – The company's capitalisation profile remains comfortable with a net worth of Rs. 5,063 crore as on June 30, 2026 (Rs. 4,906 crore as on March 31, 2026). The CRAR stood at 20.4% (Tier I -

16.6%) as on June 30, 2026 compared to the regulatory requirement of 15% (Tier I requirement of 10%). The gearing was 5.7 times as on June 30, 2026 and March 31, 2026. In this regard, the share of high-quality infrastructure projects (lower risk weight of 50%) accounted for 40% of the portfolio as on June 30, 2026.

As on June 30, 2026, NIIF SOF held a 39.7% stake in the company, followed by AIFL (30.8%), the GoI (25.1%) and HDFC Bank (4.4%). NIIF IFL, vide its stock exchange filing dated July 06, 2026, intimated that its board has noted the proposed sale of AIFL's entire 30.8% stake in the company, comprising 42,39,32,487 equity shares, to NIIF SOF subject to regulatory approvals. ICRA notes that pursuant to the closure of the proposed transaction, NIIF SOF's stake would increase to 70.5%, followed by the GoI (25.1%) and HDFC Bank Limited (4.4%).

NIIFL is an investor-owned fund manager, anchored by the GoI in collaboration with leading global and domestic institutional investors. It is a collaborative investment platform for international and Indian investors looking for investment opportunities in infrastructure and other high growth sectors of the country.

In ICRA's opinion, prudent capitalisation levels are one of the key risk mitigants and a monitorable for a portfolio that has a relatively high concentration risk. ICRA expects NIIF IFL to maintain prudent capitalisation levels and believes that support from key shareholders will be forthcoming if required. The proposed transaction, which would result in an increase in NIIF SOF's stake, is not expected to impact the credit profile of NIIF IFL.

Profitability supported by tax-exemption status enjoyed by IDFs – NIIF IFL's net interest margin (NIM) has remained range-bound (1.9-2.2%) over the past four years, with a downward bias due to the higher gearing and range-bound lending spreads. In line with past trends, the wholesale nature of operations kept the company's operating expenses low at 0.3% of average managed assets (AMA) in Q1 FY2027 (0.2% in FY2026). The provisioning costs were nil in Q1 FY2027 vis-à-vis ~Rs. 13 crore (0.04% of AMA) in FY2026. The provisioning requirements remained low as the loan portfolio has not witnessed any delinquencies/slippages since inception. The company reported a profit after tax (PAT) of Rs. 157 crore in Q1 FY2027 (Rs. 600 crore in FY2026), leading to a largely stable return on assets (RoA) of 1.9% in Q1 FY2027 (2.0% in FY2026). ICRA notes that, subject to compliance with the conditions stipulated by the Central Board of Direct Taxes (CBDT), an NBFC-IDF's income is exempt from tax, supporting its future profitability. ICRA notes that regulatory changes could have an adverse impact on the profitability of NBFC-IDFs.

Credit challenges

Relatively high concentration risk – Regulations require all NBFC-IDFs to take exposure only in operational infrastructure projects with at least one year of satisfactory commercial operations and allows direct lending to TOT projects, mitigating construction and execution risks. NIIF IFL's portfolio has an average of over seven years of operations against the regulatory minimum of one year. However, the inherent nature of the business of infrastructure financing means that the company is exposed to project risks and the exposures are concentrated. Hence, its portfolio would remain vulnerable to asset quality shocks in case of slippages in a few key exposures, which may adversely affect its profitability. The concentration risk remains with the top 10 borrowers accounting for 27% of the total portfolio as on June 30, 2026 (29% as on March 31, 2026). Going forward, NIIF IFL's ability to maintain strict underwriting standards while growing the portfolio would be a key monitorable.

Liquidity position: Strong

NIIF IFL's asset-liability maturity (ALM) profile, as on June 30, 2026, reflected positive cumulative mismatches across all buckets up to 6 months. As on June 30, 2026, the company had available liquidity in the form of cash and liquid investments up to Rs. 723 crore and scheduled inflows (including interest) of Rs. 5,130 crore from performing advances over the next one year, providing comfortable liquidity cover over debt repayments (including interest) of Rs. 6,183 crore due during the above-mentioned period.

NBFC-IDFs can raise resources through the issuance of bonds with a minimum maturity of five years and the loan route via external commercial borrowings (ECBs) with a minimum tenure of five years. Shorter-tenure bonds and commercial paper are permitted up to 10% of the outstanding debt. Further, since NBFC-IDFs are permitted to refinance infrastructure projects that have completed at least one year of satisfactory commercial operations, loan repayments start immediately after disbursement, supporting the ALM profile.

Rating sensitivities

Positive factors – Not applicable

Negative factors –Pressure on NIIF IFL's ratings could emerge on account of increase in leverage beyond 9 times on sustained basis and/or weakening of the asset quality leading to continued deterioration in solvency. A significant change in the regulatory framework, leading to an increase in portfolio vulnerability, and/or a change in the profile of the key shareholders could warrant a rating revision.

Analytical approach

About the company

NIIF IFL is an IDF under the NBFC structure, set up in March 2014 and operating after the receipt of RBI approval on September 22, 2014. It provides long-term financial assistance for various infrastructure projects, which have completed at least one year of satisfactory commercial operations.

While NIIF IFL was incorporated as IDFC Infra Debt Fund Limited, it was renamed IDFC Infrastructure Finance Limited (IDFC IFL) in January 2017 and was subsequently renamed NIIF Infrastructure Finance Limited (NIIF IFL) with effect from July 11, 2019, following the change in ownership in March 2019. In March 2019, IDFC Financial Holding Company Limited (IDFC FHCL) transferred 51.48% of its stake in IDFC IFL to NIIF SOF and SBI Life Insurance Company Limited transferred its entire holding in IDFC IFL to NIIF SOF. In March 2020, NIIF IFL announced that AIFL, an NBFC-infrastructure finance company (NBFC-IFC), acquired a 30% equity stake from IDFC FHCL. As on June 30, 2026, NIIF SOF had a 39.7% equity stake in NIIF IFL, followed by AIFL (30.8%), the GoI (25.1%) and HDFC Bank Limited (4.4%). NIIF IFL, vide its stock exchange filing dated July 06, 2026, intimated that its board has noted the proposed sale of AIFL's entire 30.8% stake in NIIF IFL, comprising 42,39,32,487 equity shares, to NIIF SOF subject to regulatory approvals.

NIIF IFL reported a PAT of Rs. 600 crore in FY2026 on a total asset base of Rs. 33,207 crore as on March 31, 2026 compared to a PAT of Rs. 487 crore in FY2025 on a total asset base of Rs. 27,990 crore as on March 31, 2025. It had a net worth of Rs. 4,906 crore with a gearing of 5.7 times as on March 31, 2026 (Rs. 4,326 crore and 5.4 times, respectively, as on March 31, 2025). It reported nil gross stage 3 as on March 31, 2026 (nil as on March 31, 2025).

In Q1 FY2027, the company reported a PAT of Rs. 157 crore on a total asset base of Rs. 34,089 crore as on June 30, 2026. It had a net worth of Rs. 5,063 crore with a gearing of 5.7 times and nil gross stage 3 as on June 30, 2026.

Aseem Infrastructure Finance Limited

An RBI-regulated NBFC-IFC incorporated in May 2019, Aseem Infrastructure Finance Limited (AIFL) is a portfolio company of NIIF SOF, which has a majority stake in the company. The RBI granted a certificate of registration (CoR) to the company on January 28, 2020, which initiated lending operations in Q2 FY2021. AIFL was formed with the objective of lending across all phases of the infrastructure project lifecycle with a mix of operating brownfield and greenfield assets. Its board comprises two nominees of NIIF SOF and three independent directors.

NIIF IFL, vide its stock exchange filing dated July 06, 2026, intimated that its board has noted the proposed sale of AIFL's entire 30.8% stake in the company, comprising 42,39,32,487 equity shares, to NIIF SOF subject to regulatory approvals. ICRA notes

that pursuant to the closure of the proposed transaction, NIIF SOF's stake would increase to 70.5%, followed by the GoI (25.1%) and HDFC Bank Limited (erstwhile Housing Development Finance Corporation Limited; 4.4%).

National Investment and Infrastructure Fund II

NIIF Strategic Opportunities Fund (SOF), also referred as NIIF Fund II, is a large India-focused growth equity fund registered with SEBI as a Category II AIF. National Investment and Infrastructure Fund Limited (NIIFL) acts as the investment manager of NIIF Fund II. NIIFL is a sovereign-linked alternative asset manager, anchored by the Government of India, catalysing global capital to invest in sectors and asset classes that drive India's growth story. GoI's stake in NIIFL is 49%. NIIFL manages assets over USD 7 billion in equity capital commitments across four strategies: Infrastructure, Private Markets, Growth Equity and Climate Investments.

NIIF Fund II was established with the objective of providing long-term capital to high-growth future-ready businesses in India. NIIF Fund II has built a scalable integrated financial services platform by investing equity in NIIF Infrastructure Finance Limited and AIFL, enabling them to become sizeable players in the infrastructure debt financing space.

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: Click here

ABOUT ICRA LIMITED

ICRA Limited was set up in 1991 by leading financial/investment institutions, commercial banks and financial services companies as an independent and professional investment Information and Credit Rating Agency.

Today, ICRA and its subsidiaries together form the ICRA Group of Companies (Group ICRA). ICRA is a Public Limited Company, with its shares listed on the Bombay Stock Exchange and the National Stock Exchange. The international Credit Rating Agency Moody's Investors Service is ICRA's largest shareholder.

ICRA ratings should not be treated as recommendation to buy, sell or hold the rated debt instruments. ICRA ratings are subject to a process of surveillance, which may lead to revision in ratings. An ICRA rating is a symbolic indicator of ICRA's current opinion on the relative capability of the issuer concerned to timely service debts and obligations, with reference to the instrument rated. Please visit our website www.icra.in or contact any ICRA office for the latest information on ICRA ratings outstanding. All information contained herein has been obtained by ICRA from sources believed by it to be accurate and reliable, including the rated issuer. ICRA however has not conducted any audit of the rated issuer or of the information provided by it. While reasonable care has been taken to ensure that the information herein is true, such information is provided 'as is' without any warranty of any kind, and ICRA in particular, makes no representation or warranty, express or implied, as to the accuracy, timeliness or completeness of any such information. Also, ICRA or any of its group companies may have provided services other than rating to the issuer rated. All information contained herein must be construed solely as statements of opinion, and ICRA shall not be liable for any losses incurred by users from any use of this publication or its contents.
