Rationale and key rating drivers

CARE Ratings Limited (CareEdge Ratings) had assigned the rating of 'Provisional CARE AAA (SO)' [pronounced as 'Triple A (Structured Obligation)'] to the Series A1 PTCs and 'Provisional CARE AA (SO)' [pronounced as 'Double A (Structured Obligation)'] to the Equity Tranche PTCs, issued by Nirman Trust-II 03 2025, backed by a pool of home loan receivables originated by IKF Home Finance Limited (IKF).

Ratings are now confirmed and 'CARE AAA (SO)' [pronounced as 'Triple A (Structured Obligation)'] has been assigned to the Series A1 PTCs and 'CARE AA (SO)' [pronounced as 'Double A (Structured Obligation)'] has been assigned to the Equity Tranche PTCs, respectively.

The above ratings were final based on the below-mentioned documents submitted to the satisfaction of CareEdge Ratings:

- a. Accounts agreement
- b. Assignment agreement
- c. Servicing agreement
- d. Trust deed
- e. Information memorandum
- f. Power of attorney
- g. Legal opinion from an independent legal counsel Trilegal
- h. KYC audit report

Rating sensitivities: Factors likely to lead to rating actions

Positive factors - Factors that could, individually or collectively, lead to positive rating action/upgrade:

For Series A PTCs:

None

For Equity Tranche PTCs:

- Delinquencies (90+ days past due [DPD] as % of initial principal outstanding [POS]) of less than 2% and the sustained high collection efficiency (cumulative collection efficiency of over 98%).
- Build-up of cash collateral (CC) of over 2x the initial proposed (as a percentage of the balance POS).

Negative factors - Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Delinquencies (90+ DPD as % of initial POS) of over 5% and the sustained lower collection efficiency (cumulative collection efficiency of less than 90%).
- Deterioration in the credit profile of the originator.

¹Complete definition of ratings assigned are available at www.careratings.com and other CARE Ratings Limited's publications.

- Utilisation of CC.
- Non-adherence to key transaction terms envisaged at the time of the rating.

Analytical approach

The final ratings are based on conformity of the executed transaction documents with the proposed structure of the transaction. Ratings also factor inter alia, analysis of underlying pool of receivables, expected performance of the pool, performance of originator's portfolio, and transaction structure including the proposed credit enhancement.

Detailed description of key rating drivers

Ratings assigned are finalised based on the structure provided to CareEdge Ratings by IKF, the originator. Ratings have been confirmed after copies of the legal documents executed in accordance with the structure, a due-diligence audit report by an external auditor, and an independent legal opinion was furnished by the originator (IKF), to the satisfaction of CareEdge Ratings.

Key strengths:

- The robustness of transaction structure and well-defined payment mechanism.
- Credit enhancement comprising CC, subordinated equity tranche, and excess interest spread (EIS).
- No overdue contracts as on the pool cut-off date; all contracts are ever current as on the pool cut-off date.
- Underwriting policies and collection capabilities of IKF.
- High-weighted average seasoning (based on EMI's paid) of ~24 months with amortisation of ~6% as of pool cut-off date.

Key weakness:

- High concentration with the top three states accounting for 84% of the pool.

Liquidity: Strong

For Series A PTCs and Equity Tranche PTCs: Strong

The inherent liquidity in the structure is strong. The interest payouts for Series A PTCs are promised monthly, and post redemption of Series A PTCs, the interest payouts for Equity Tranche PTCs are promised monthly, while the principal of Series A PTCs and Equity Tranche PTCs is promised to be paid by final legal maturity. In case of delinquency, the payouts are expected to be supported by credit enhancement consisting of CC, principal subordination in the form of subordinated equity tranche (For Series A PTCs), and EIS.

Key rating assumptions and adequacy of credit enhancement:

CareEdge Ratings has analysed the transaction to assess whether the CE is sufficient to cover the shortfalls. Since the transaction is sensitive to the credit quality of the underlying pool, CareEdge Ratings has analysed the performance of static pools provided by the originator and the overall portfolio performance of the originator. Considering the borrower profile, nature of the loan, pool characteristics, and portfolio performance, CareEdge Ratings has taken the average shortfall at 4.00%-5.00% of the POS. The base case shortfalls were stressed along with other key factors, such as timing of shortfalls, recovery assumptions, and time to recovery. The pool cash flow has been further adjusted for prepayments of underlying loans, assuming a monthly prepayment in the range of 0.50%-1.00%. CareEdge Ratings has stipulated credit enhancement which is commensurate with credit rating of the PTCs.

Key risks, concerns, and mitigants:

The securitisation transaction involves several risks, including credit risk from borrower defaults, commingling risk due to time lags in fund deposits, basis risk from differing interest rate benchmarks, prepayment risk from early principal repayments, servicer bankruptcy risk, legal risk regarding the validity of receivable transfers, and counterparty risk involving transaction parties. These risks are factored while assigning rating, wherever needed, and partially mitigated through credit enhancements, separate record-keeping, credit rating/profile of the originator, transaction structuring, true sale of receivables, legal opinion from independent legal counsel. The transaction structure also has provision to change counterparties, such as trustee and banker among others.

Key terms of Servicer Contract:

The servicing agreement has covered role of the originator as the Collection and Payment Agent (CPA) for the special purpose vehicle (SPV) in managing collections from underlying borrowers, without informing them of the assignment. The Servicer (originator) follows its standard procedures for collections, including recovery actions, and ensures timely transfers of funds to the SPV under an M+1 payment structure. The trustee monitors the sufficiency of funds for investor payouts one day prior to payout date and utilises CC in case of shortfall. The Servicer is also submitting detailed reports on billing, collections (including prepayment), overdue amounts with aging thereof, cash flow schedules to the trustee and such other information as may be required by the trustee. The terms of the agreement have provisions for the appointment of an alternate servicer in case of servicer event of default.
