

Nirman Trust-II 03 2025

Originator: IKF Home Finance Limited

March 27, 2025

Instrument [#]	Amount (₹ crore)	Structure	Tenure* (months)	Rating ¹	Credit Enhancement ^{\$} (₹ crore)		Rating Action
					Subordination	Cash Collateral	
Series A PTCs	37.08	Par (TI-UP Turbo)	227	Provisional CARE AAA (SO)	1.95	3.12	Assigned
Equity Tranche PTCs	1.95	Par (UI- UP)		Provisional CARE AA (SO)	-		

Details of instruments/facilities in Annexure-1.

The Series A PTCs are rated based on timely payment of interest and payment of principal on or before the last scheduled payout date.

The Equity Tranche PTCs are rated based on ultimate payment of interest until Series A PTCs are outstanding, and timely interest post redemption of Series A PTCs, and ultimate payment of principal on or before the last scheduled payout date.

* Tenure / door-to-door maturity may change due to prepayments or changes in interest rates, if any.

\$ Excess interest spread (EIS) shall be utilised to prepay the Series A PTCs on a monthly basis at every payout.

Rating in the absence of the pending steps/documents	No rating can be assigned
---	----------------------------------

Rationale and key rating drivers

CARE Ratings Limited (CARE Ratings) has assigned a rating of 'Provisional CARE AAA (SO)' [pronounced as 'Triple A (Structured Obligation)'] to the Series A PTCs and a rating of 'Provisional CARE AA (SO)' [pronounced as 'Double A (Structured Obligation)'] to the Equity Tranche PTCs, proposed to be issued by Nirman Trust-II 03 2025 backed by home loan receivables originated by IKF Home Finance Limited (the Originator or IKFHF).

The rating is based on the credit quality of underlying loans, support in the form of credit enhancement (CE), credit underwriting and servicing capability of the originator, well-defined payment mechanism, and robust legal structure of the transaction.

The final rating will be assigned after copies of following documents, duly executed in accordance with the structure and to the satisfaction of CARE Ratings, are furnished by the originator:

- Assignment agreement
- Trust deed
- Power of attorney
- A legal opinion from an independent legal counsel
- Due diligence audit report
- Any other documents executed for the transaction.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors - Factors that could, individually or collectively, lead to positive rating action/upgrade:

For Series A PTCs: None

For Equity Tranche PTCs:

- Delinquencies (90+ days past due [DPD] as percentage of initial principal outstanding [POS]) of <2% and the sustained high collection efficiency (cumulative collection efficiency of >98%).
- Build-up of cash collateral (CC) of more than 2x the initial proposed (as a percentage of the balance POS).

Negative factors - Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Delinquencies (90+ DPD as percentage of initial POS) of >5% and the sustained lower collection efficiency (cumulative collection efficiency of < 90%).
- Deterioration in the credit profile of the originator.
- Utilisation of CC.
- Non-adherence to key transaction terms envisaged at the time of the rating.

¹Complete definitions of ratings assigned are available at www.careedge.in and in other CARE Ratings Limited's publications.

Analytical approach

The rating is based on inter alia, analysis of underlying pool of receivables, expected performance of the pool, performance of originator's portfolio, and transaction structure including the proposed credit enhancement.

Detailed description of key rating drivers

The transaction is structured at par and the Series A PTCs are rated for the timely payment of interest with the repayment of principal on or before the final legal maturity. The Equity Tranche PTCs are rated for ultimate payment of interest until the Series A PTCs are outstanding and timely payment of interest post redemption of Series A PTCs with the repayment of principal on or before the final legal maturity. The principal payment towards the Equity Tranche PTCs is subordinate to the Series A PTCs. Excess interest spread (EIS) shall be utilised to prepay the Series A PTCs and Equity Tranche PTC monthly per waterfall mechanism.

The assigned pool consists of over 200 home loan contracts, aggregating to a POS of ₹39.03 crore as on the cut-off date. The top three states account for ~83% of the pool. All the contracts are current on payment. The pool has weighted an average seasoning of ~24 months with an amortisation of ~6%. The pool has minimum credit bureau score (CIBIL) of 680 with ~94% of the contracts in the pool have score of over 700. The pool is granular with scheduled of cash flows from the underlying loans. The assignment of receivables to the special purpose vehicle (SPV) lends strength to these cash flows and the rating factors the terms of servicing agreement as detailed hereinafter.

The CE will comprise CC of 8.00%, subordinated equity tranche of 5.00%, and subordination of excess interest spread (EIS) of ~77% of the pool POS in the structure. The CC will be in the form of fixed deposits (FDs) with a lien marked in favour of the trust, per CARE Ratings' criteria. The support of both, Equity Tranche and EIS, is subject to realisation. The EIS is also subject to compression considering prepayments in the pool. The cash flow from the underlying pool, and external credit enhancement, will be used to make payout to the PTC investors.

Key strengths:

- The robustness of the transaction structure and a well-defined payment mechanism.
- CE comprising CC, subordinated equity tranche, and EIS.
- No overdue contracts as on the pool cut-off date.
- Underwriting policies and the collection capabilities of IKFHF.
- High weighted average seasoning (based on EMI's paid) of ~24 months with amortisation of ~6% as of pool cut-off date.

Key weakness:

- High concentration, with the top three states accounting for ~83% of the pool.

Liquidity: Strong

For Series A PTCs and Equity Tranche PTCs: Strong

The inherent liquidity in the structure is strong. The interest payouts for Series A PTCs are promised monthly, and post redemption of Series A PTCs, the interest payouts for Equity Tranche PTCs are also promised monthly while the principal of Series A PTCs and Equity Tranche PTCs is promised to be paid by final legal maturity. In case of delinquency, the payouts are expected to be supported by credit enhancement consisting of CC, principal subordination in the form of subordinated equity tranche (For Series A PTCs), and EIS.

Key rating assumptions and adequacy of credit enhancement:

CARE Ratings has analysed the transaction to assess whether the CE is sufficient to cover the shortfalls. Since the transaction is sensitive to the credit quality of the underlying pool, CARE Ratings has analysed the performance of static pools provided by the originator and the overall portfolio performance of the originator. Considering the borrower profile, nature of the loan, pool characteristics, and portfolio performance, CARE Ratings has taken the average shortfall at 4.00%-5.00% of the POS. The base case shortfalls were stressed and other key factors, such as the timing of shortfalls, recovery assumptions, and the time to recovery. The pool cash flow has been further adjusted for prepayments of underlying loans, assuming monthly prepayments in the range of 0.50%-1.00%. CARE Ratings has stipulated credit enhancement, which is commensurate with credit rating of the PTCs.

Key Risks, Concerns and Mitigants:

The securitisation transaction involves several risks, including credit risk from borrower defaults, commingling risk due to time lags in fund deposits, basis risk from differing interest rate benchmarks, prepayment risk from early principal repayments, servicer bankruptcy risk, legal risk regarding the validity of receivable transfers, and counterparty risk involving transaction parties. These risks are factored while assigning rating, wherever needed, and partially mitigated through credit enhancements, separate record-

keeping, credit rating/profile of the originator, transaction structuring, true sale of receivables, legal opinion from independent legal counsel. The transaction structure also has provision to change counterparties, such as trustee and banker among others.

Applicable criteria

[Policy on Default Recognition](#)

[Assignment of Provisional rating](#)

[CARE Ratings' methodology for asset/mortgage-backed securitisation](#)

Validity of Provisional rating

The Provisional rating will be converted into a final rating after the receipt of the above-mentioned transaction documents duly executed within 90 days from the date of issuance of the instrument. An extension of 90 days may be granted on a case-to-case basis in line with CARE Ratings' Policy on the Assignment of Provisional Ratings.

Risks associated with Provisional nature of credit rating

When a rating is assigned pending execution of certain critical documents or steps to be taken, the rating is a 'Provisional' rating indicated by prefixing 'Provisional' before the rating symbol. On execution of the critical documents to the satisfaction of CARE Ratings, the final rating is assigned by CARE Ratings. In the absence of receipt of documents or in case such documents deviate significantly from the transaction structure considered by CARE Ratings, the Provisional rating will be reviewed or withdrawn in line with the Policy on Assignment of Provisional Ratings and it is possible that no rating may be assigned.

About the Originator / Servicer and industry

Industry classification

Macroeconomic indicator	Sector	Industry	Basic industry
Financial services	Financial services	Finance	Securitisation

Incorporated in 2002 as IKF Financial Services Private Limited, IKF is registered as housing finance company (HFC) and is primarily engaged in providing home loan products/refinance solutions. The company has presence across Andhra Pradesh, Telangana, Karnataka, Tamil Nadu, Maharashtra, and Gujarat. Key terms of Servicer Contract:

The servicing agreement shall cover role of the originator as the Collection and Payment Agent (CPA) for the SPV in managing collections from underlying borrowers, without informing them of the assignment. The Servicer (originator) follows its standard procedures for collections, including recovery actions, and ensures timely transfers of funds to the SPV under an M+1 payment structure. The trustee monitors the sufficiency of funds for investor payouts one day prior to payout date and utilises CC in case of shortfall. The Servicer must also submit detailed reports on billing, collections (including prepayment), overdue amounts with aging thereof, cash flow schedules to the trustee and such other information as may be required by the trustee. The terms of the agreement shall have provisions for the appointment of an alternate servicer in case of servicer event of default.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
