Sub.: Disclosure under Regulation 30 of the SEBI (LODR) Regulations, 2015, as amended.

Dear Sir, Madam,

We wish to inform you that India Ratings and Research (“Ind-Ra”) has:

- i. affirmed the rating of ‘**IND AA+ / Stable**’ assigned to the debt instruments of IDFC FIRST Bank Limited (“Bank”), comprising Basel III Tier II Bonds and Infrastructure Bonds, aggregating to ₹ 17,520 crore; and
- ii. withdrawn the rating and outlook assigned to the matured non-convertible debentures aggregating to ₹ 408 crore, following their full redemption, with no amount outstanding.

Further, CARE Ratings Limited (“CareEdge Ratings”) has re-affirmed the ‘**CARE AA+ / Stable**’ rating assigned to the Bank’s long-term bank facilities aggregating to ₹ 692.38 crore and long-term debt instruments aggregating to ₹ 248.10 crore.

The rating rationales issued by Ind-Ra and CareEdge Ratings are enclosed.

Kindly take the above on record.

Thanking you,

Yours faithfully,

For IDFC FIRST Bank Limited

*Details in Annexure

#unutilised

Analytical Approach

Ind-Ra continues to take a standalone view of IDFCFB to arrive at the ratings.

Detailed Rationale of the Rating Action

The ratings reflect IDFCFB’s continued franchise expansion, its experienced management, stable liability franchise, diversified product portfolio, and stable capital buffers. The ratings, however, remain constrained by higher operating expenditure and credit costs, which have been impacting the bank’s internal accruals that remain on the lower side compared to higher or similar rated peers.

List of Key Rating Drivers

Strengths

- Sizeable retail franchise with diversified product lines
- Sizable retailisation of funding profile
- Adequate capital buffers

Weaknesses

- Operating expense remains drag on internal accruals
- Asset quality needs to be monitored

Detailed Description of Key Rating Drivers

Sizeable Retail Franchise with Diversified Product Lines: IDFCFB’s retail, agri and micro, small and medium enterprises (MSME) book accounted for 79% of the total funded exposure in 1QFY27. The bank intends to continue focusing on maintaining the current mix of its overall loan portfolio, with sustained focus on retail and MSME loans, thereby driving its granular loan portfolio. This increased retailisation has helped the bank maintain its margins, considering its cost of funds are higher, though declining, than that of its larger peers. IDFCFB’s net interest margin (NIM) improved to 5.96% in 1QFY27 (1QFY26: 5.71%), supported by a moderation in its cost of funds and an improvement in better yielding asset mix.

The share of microfinance (MFI) loans moderated in overall book and the bank has availed credit guarantee funds for micro units (CGFMU) cover for all its incremental MFI loan disbursements since January 2024 and reached 93% coverage level of the MFI loan book as of June 2026. Also, the bank recovered INR5.1billion in 1QFY27 against which the bank has created contingent provision. Further recoveries are expected over FY27-FY28 as per management. The bank witnessed substantial growth in the corporate segment, largely in the emerging corporates and financial institutions segment, and this is likely to continue in the medium term, supported by the bank's strategy.

Sizable Retailisation for Funding Profile: IDFCFB's top 20 deposits-to-total deposits increased to 9.39% in FY26 (FY25: 7.95%) but remains in line with peers. The bank has mobilised decent deposit in recent RBI window on foreign currency non-resident deposit (FCNR) deposit which would be utilised incrementally to retire wholesale debt, fund growth and help in liquidity coverage ratio (LCR) maintenance, thereby supporting NIM. The current account saving account (CASA) ratio remained largely stable at 50.8% in 1QFY27 (FY26: 49.8%). In 1QFY26, the bank's CASA deposits accounted for 44.9%% (FY26: 44.3%; FY25: 40.6%) of the total liabilities (deposits + borrowing) and it has been on an improving trend compared to the industry. However, its costs remained higher than that of its larger rated peers. As part of its strategy, the bank plans to maintain its higher saving rate until there is a moderation in the share of borrowings in the overall funding and bank attains significant operating leverage benefits, post which there could be a reduction in the peak saving rate, providing a benefit.

Adequate Capital Buffers: Although IDFCFB's capital buffers improved following its capital raise in 2QFY26, capital absorption remained high as business growth exceeded internal accruals, leading to a moderation in common equity tier-1 (CET1) ratio to 13.3% (FY26: 13.7%; FY25: 13.2%). The bank has shown ability to raise capital at frequent intervals; this would continue to aid its growth until internal capital generation exceeds loan growth. However, given that its guided growth remained higher than internal accruals, the bank is likely to require a capital raise in FY28 to maintain adequate capital buffers above regulatory minimum requirements, in line with similarly rated peers.

Operating Expense Remains Drag on Internal Accruals: Despite the scaling up of its loan book, IDFCB's return ratios remain subdued due to higher operating expense. The return on assets increased to 1.06% in 1QFY27 (FY26: 0.4%; FY25: 0.5%), supported by treasury gain and tax refund and growth of 20.6% yoy in funded assets. IDFCFB's cost-to-income ratio (1QFY27: 69.2%; FY26: 75.2%) remained higher than its peers, despite the bank substantially reducing its operating expenses while continuing to invest for branch expansion, addition of manpower across product lines, and technology. Also, SMA 1 and SMA 2 as a percentage of retail, agri and MSME loans reduced to 0.77% in 1QFY27 (FY26: 1.07%). Ind-Ra expects the improvement in internal accruals in the medium term to be driven by higher income growth relative to operating expense growth, thereby leading to an improvement in cost-to-income ratio and control and moderation in the overall credit cost from its historical trend, which remains a rating monitorable.

Asset Quality Needs to be Monitored: IDFCFB's overall gross non-performing assets (NPAs) improved in the past four quarters to 1.51% in 1QFY27 (FY26: 1.61%; FY25: 1.87%), with the provision coverage ratio remaining steady at 71.5% (70.5%; 72.3%). The annualised credit cost of average funded assets remained at 153bp for 1QFY27 (FY26: 213bp; FY25: 246bp). Although credit costs remained higher than its peers, due to their higher share of unsecured book, which accounted for 39.7% of total advances in FY26 (FY25: 40.5%), they have been moderating overall. With stress in MFI book moderating and incrementally growing, the management expects the bank's credit cost to normalise to 150bp-160bp in FY27. This in turn could drive return on assets towards 100bp in FY27. Also, Incrementally, any pressure on borrowers' cashflows due to overleveraging or a broad economic slowdown, where the bank's ability to manage its asset quality is better than that of its peers, remain key monitorables.

Liquidity

Adequate: IDFCFB's liquidity remained stable in 1QFY27, with its quarterly liquidity coverage ratio standing at 116% (FY26: 113.8%; FY25: 116.6%). Moreover, the bank's asset-liability tenure had minor gaps across shorter buckets at 1QFY27. Also, it had 4.85% of net demand time liabilities as an excess statutory liquidity ratio, which provided an adequate buffer to meet its short-term funding requirements at 1QFY27.

Rating Sensitivities

Positive: A substantial improvement in the franchise size and scale, large granular retail funding in line with higher-rated banks, consistent profitability buffers and return ratios, maintaining stable through-the-cycle asset quality and stronger capital buffers could be key positive rating drivers.

Negative: The following events that could individually or collectively lead to a negative action:

- higher-than-expected credit costs or a weakening of the provision cover or diluted tangible capitalisation buffers
- CET1 buffer falling and remaining below 12.5% on a sustained basis;
- a material decline in the pace of granularisation of deposits in its funding mix or a sustained reduction of market share in advances or deposits

DISCLAIMER

India Ratings and Research Private Limited (India Ratings) is a private limited company registered under the provisions of the Companies Act, 1956, having CIN U67100MH199SFTC140049, and registered office at Wockhardt Towers, 4th Floor, West Wing, Bandra Kurla Complex, Bandra East, Mumbai, Maharashtra, 400051, India. The contact details of India Ratings are Telephone No.: +91 22 4000 1700 and Fax. No.: +91 22 4000 1701. India Ratings is registered with the Securities and Exchange Board of India (SEBI) as a Credit Rating Agency under Section 12 of the SEBI Act, 1992, having SEBI Registration Number IN/CRA/002/1999.

India Ratings and Research Private Limited (India Ratings) is a Credit Rating Agency registered with the Securities and Exchange Board of India (SEBI) under Section 12 of the SEBI Act, 1992. In this capacity, India Ratings undertakes ratings of listed and proposed to be listed instruments that fall under the regulatory oversight of SEBI. In addition, in line with Regulation 9(f) of the SEBI (Credit Rating Agencies) Regulation, 1999, India Ratings rates financial instruments falling under the purview of other financial sector regulators (FSR). Instruments which come under the purview of other FSRs do not come under the overall governance of SEBI. Issuers/Users/readers of this communication/report are, therefore, cautioned to know the risks involved in dealing in such instruments. Such instruments can carry Liquidity and Price Risk which pertains to how saleable a Security is in the market. If a particular Security does not have a market at the time of sale, then the Investor's investments may have to bear an impact depending on its exposure to that particular Security. It is not possible to predict if, and to what extent, a secondary market may develop in the debt securities or at what price the debt securities will trade in the secondary market or whether such market will be liquid or illiquid. The more limited the secondary market is, the more difficult it may be for holders of the debt securities to realise value for the debt securities prior to redemption of the debt securities. If the debt securities are unlisted, then the ability of the Investors to resell or trade them may be limited, leading to liquidity and price risk on the debt securities. The returns from a particular asset class may underperform returns from other asset classes. The changes in government policy in general and changes in taxation may impact the returns to investors. There can be external risks arising out of geopolitical situations which can lead to volatility in/impact the performance of the individual securities. Issuers/Users/readers are advised to note that SEBI's investor protection mechanisms and SEBI's grievance or dispute redressal mechanisms are not applicable to ratings assigned by India Ratings that fall under the purview of other FSRs. Should you have any grievance with instruments under the purview of other FSRs, please write to infogrp@indiaratings.co.in. For any grievance with instruments under the purview of SEBI, please write to investor.grievances@indiaratings.co.in.

IDFC First Bank Limited

September 29, 2026

Facilities/Instruments	Name of the Regulator ¹	Amount (₹ crore)	Rating ²	Rating Action
Long-term bank facilities	RBI	692.38	CARE AA+; Stable	Reaffirmed
Long-term instruments	SEBI	248.10	CARE AA+; Stable	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

Reaffirmation of ratings assigned to long-term debt instruments of IDFC First Bank Limited (IFBL) reflects the bank's comfortable capitalisation, well-diversified loan portfolio, and strengthening liability franchise, focused on CASA and retail deposits. The bank has demonstrated a consistent ability to raise capital, including a ₹7,500 crore equity infusion in Q2FY26, supporting business growth and maintaining comfortable capital ratios. The loan book remains granular and diversified, with retail, rural, and micro, small and medium enterprise (MSME) advances accounting for ~80% of the portfolio. The liability profile continues to strengthen, supported by healthy deposit growth, a strong current account saving account (CASA) ratio of 50.82%, and replacement of legacy borrowings with customer deposits.

However, these rating strengths are partially offset by the bank's moderate profitability, reflecting a relatively high-cost structure due to continued investments in branch expansion, technology, digital capabilities, and franchise building. While profitability improved in Q1FY27, supported by better operating efficiency, lower credit costs, and improving margins, the bank's ability to sustain improvements in its cost-to-income ratio remains a key monitorable.

Ratings also consider the improving asset quality profile, with gross non-performing assets (GNPA) and net non-performing assets (NNPA) ratios declining to 1.51% and 0.44%, respectively, as on June 30, 2026. The microfinance portfolio has witnessed an improvement following a reduction in exposure and stabilisation in collections. Asset quality remains monitorable, given the inherent vulnerability of unsecured lending segments, and the bank's ability to maintain stable credit costs and asset quality while scaling its business will remain an important rating consideration.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors: Factors that could individually or collectively lead to positive rating actions/upgrade:

- Sustained improvement in market share and resource profile with a higher share of retail deposits.
- Improving operating performance and improving cost-to-income ratio.

Negative factors: Factors that could individually or collectively lead to negative rating actions/downgrade:

- Higher-than-expected deterioration in asset quality, with GNPA level increasing to above 5%.
- Weakening in capitalisation levels with capital cushion over minimum regulatory requirement remaining less than 3.5% on a sustained basis.
- Declining return on total assets (ROTA) below 1% on a sustained basis.

Analytical approach:

Standalone

Outlook: Stable

Stable outlook reflects CARE Ratings Limited's (CareEdge Ratings') expectation that the bank will report a healthy advances growth, while improving its profitability and asset quality and maintaining adequate capitalisation levels.

¹SEBI: Securities and Exchange Board of India; RBI: Reserve Bank of India; MCA: Ministry of Corporate Affairs; IRDAI: Insurance Regulatory and Development Authority of India; PFRDA: Pension Fund Regulatory and Development Authority

²Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE Ratings Limited's publications.

Detailed description of key rating drivers

Key strengths

Comfortable capitalisation levels

IFBL has been maintaining comfortable capitalisation levels to support business growth and continues to maintain an adequate cushion to absorb credit costs. The bank has demonstrated its ability to raise capital, having raised equity of ₹2,196 crore in FY23, ₹3,000 crore in FY24, and ₹3,200 crore in FY25. The bank further raised ₹7,500 crore from affiliate company of Warburg Pincus and the subsidiary of private equity division of Abu Dhabi Investment Authority (ADIA) in Q2FY26, to support its growth and maintain cushion on capitalisation. The bank reported a capital adequacy ratio (CAR) of total CAR of 15.05% and Tier-I CAR (entirely Common Equity Tier-I [CET-I]) of 13.33% as on June 30, 2026, (March 31, 2026: CAR: 15.60% and CET-1: 13.73%), which were above the regulatory requirement of 11.5% and 9%, respectively.

The bank plans to mobilise capital in the next one year. In July 2026, the board passed a resolution to raise up to ₹20,000 crore, comprising equity and debt instruments and has obtained enabling shareholder's approval in the last AGM. The proposed capital raise is expected to further strengthen the bank's capital base and provide flexibility to pursue business expansion while maintaining prudent capital buffers. However, these ratios will normalise going forward as the bank scales its loan book. CareEdge Ratings expects the bank to maintain adequate capitalisation levels in line with other private sector banks.

Diversified advances book with retail focus

Post the merger of IDFC Bank Limited and Capital First Limited (CFL) in December 2018, the bank has been diversifying its advances portfolio through sustained growth in retail lending while simultaneously targeting a calibrated increase in the corporate book to ~20% of total advances. The bank's retail book has a diversified product mix including home loans, loan against property (LAP), small and medium enterprise (SME) loans, vehicle loans, consumer durable loans, credit cards, personal loans, and micro-finance, among others. No individual product segment accounted for over 20% of the retail, rural and MSME financing portfolio as on June 30, 2026.

Advance book witnessed healthy growth of 21% year-on-year (y-o-y) with total advances (including credit substitutes) standing at ₹3,05,370 crore as on June 30, 2026 (March 31, 2026: ₹2,90,278 crore) led by growth in mortgage loans, vehicle loans, MSME loans, and wholesale loans. Retail, rural, and MSME portfolio continued to constitute ~80% of advances, reflecting the bank's focus on maintaining a granular and diversified lending franchise with lower borrower concentration risks. While the wholesale portfolio accounted for ~20% of advances as on June 30, 2026, the overall business mix remains largely aligned with the bank's strategy of retail-led growth.

Going forward, the advances mix is likely to hover around these levels with marginal uptick in wholesale book, although the composition within retail may change.

Healthy deposit growth supported by a healthy CASA franchise

IFBL has reported a healthy total deposit growth of 17% in FY26, with deposits rising from ₹2,52,065 crore in FY25 to ₹2,94,475 crore in FY26, and further to ₹3,11,892 crore as on June 30, 2026, with QoQ growth 5.9% and YoY growth of 17.8%. The CASA ratio increased to 50.82% as on June 30, 2026 (March 31, 2026: 49.80%), the highest among private banks, while retail customer deposits accounted for ~80% of total customer deposits, underscoring a strong granular liability base.

The bank's funding profile has further benefited from the maturity of legacy high-cost borrowings in FY26, which have largely been replaced by customer deposits, supporting improvement in the liability mix and moderation in the credit-deposit ratio to 95.49% as on June 30, 2026. Despite the strong CASA franchise, cost of deposits and overall cost of funds remain relatively higher than those of private sector peers. Deposit accretion witnessed some moderation in Q4FY26, following the fraud-related to Haryana government related accounts. While Foreign Currency Non-Resident (Bank) [FCNR(B)] scheme has supported near term deposit flows, going forward, the bank's ability to sustain healthy deposit mobilisation, maintain its strong CASA, and retail deposit franchise, and achieve a stable cost of funds while supporting business growth will remain key monitorable.

Key weaknesses

Moderate profitability due to high cost to income ratio

IFBL's profitability remained subdued in FY26, with the ROTA moderating to 0.44% (FY25: 0.48%), which is relatively lower compared to other private banks. Earnings were impacted by a moderation in net interest margins (NIMs), due to sharp decrease in the relatively high-yielding microfinance portfolio after the MFI industry crisis, elevated operating expenses, and relatively high credit costs. NIM declined to 5.72% in FY26 from 6.05% in FY25, due to higher share of relatively lower-yielding secured assets (including wholesale exposures), and a reduction in the microfinance portfolio. However, despite having commenced a gradual

increase in the share of microfinance loans, the Bank reported a healthy NIM of 5.96% in Q1FY27. Management has guided for FY27 NIM to be around 5.80%, as indicated during the Q1FY27 earnings conference call.

The bank continues to operate with a relatively high-cost structure, reflecting ongoing investments in branch expansion, technology and digital infrastructure, customer acquisition, and personnel. Consequently, the cost-to-income ratio remained elevated and increased to 75.21% in FY26 from 71.82% in FY25. However, excluding the one-off fraud related expense, the cost-to-income ratio in FY26 was 73%. Apart from slower income growth amid margin compression, operating profitability was also impacted by the one-time expenses arising from the fraud incident at the Chandigarh branch. It improved in Q1FY27, with the cost-to-income ratio moderating to 69.18%, indicating the benefits of operating efficiency and the management's focus on cost rationalisation.

Credit costs moderated to 1.45% in FY26 from 1.73% in FY25, supported by the gradual stabilisation of the microfinance portfolio. However, they remained higher than historical levels due to the bank's continued prudent provisioning stance. In Q1FY27, credit costs improved further to 1.12%, despite the creation of an additional contingent provision of ₹515 crore. The bank received a corresponding Credit Guarantee for Micro Finance under ULI (CGFMU) claim of ₹515 crore relating to the microfinance portfolio during the quarter and created an equivalent contingency provision citing macroeconomic and geopolitical uncertainties, reflecting a conservative approach towards risk management.

Profitability showed signs of improvement in Q1FY27, with ROTA increasing to 1.05% from 0.53% in Q1FY26, due to lower credit costs, improving margins and operating efficiency. Going forward, IFBL's profitability is expected to improve gradually, supported by a declining cost of funds, stabilising credit costs, cost rationalisation measures, and benefits from scale expansion, while its ability to maintain healthy asset quality and operating efficiency as the business grows will remain a key rating monitorable.

Asset quality remains monitorable

While the bank's asset quality has improved, with GNPA ratio improving from 1.87% in FY25 to 1.61% in FY26 and stood at 1.51% in Q1FY27, and NNPA ratio improved from 0.53% in FY25 to 0.48% in FY26 and stood at 0.44% in Q1FY27, asset quality remains susceptible to stress in unsecured exposures in lower ticket size retail and MSME loans.

The microfinance segment, which contributes 2.19% to loan book as on June 30, 2026, has seen an improvement, with GNPA declining from 9.73% in Q1FY26 to 3.61% in Q1FY27. IFBL has reduced its proportion of the microfinance institution (MFI) segment to 2.19% as on June 30, 2026, post stress.

Although the microfinance portfolio has witnessed a sharp improvement in asset quality, with GNPA reducing from 9.73% in Q1FY26 to 3.61% in Q1FY27, the segment remains inherently vulnerable to external shocks and borrower cash-flow disruptions. While the bank has significantly reduced its exposure to the MFI segment to 2.19% of advances as on June 30, 2026, the segment continues to warrant close monitoring.

The bank's provision coverage ratio (excluding technical write-offs) of 70.46% as on March 31, 2026, provides a reasonable buffer. The gross stressed assets to gross advances improved from 2.06% in FY25 to 1.73% in FY26, and further to 1.62% in Q1FY27. Similarly, net stressed assets to net worth stood at 3.55% in FY26 and further improved to 3.29% as on June 30, 2026. Credit costs, which remained elevated in recent years, owing to stress in the microfinance portfolio, would need to improve sustainably in line with the management guidance. The bank's ability to achieve the stated improvement in credit costs in FY27, would remain a key monitorable.

Liquidity: Adequate

IFBL's liquidity profile remained adequate with no negative cumulative mismatches in time buckets up to six months per asset liability maturity (ALM) statement as on June 30, 2026. IFBL had excess statutory liquidity ratio (SLR) investment of ~₹16,016 crore [4.85% of Net Demand and Time Liabilities (NDTL)] as on June 30, 2026. IFBL's liquidity coverage ratio and net stable funding ratio (NSFR) remained comfortable at 116.08% and 121.24%, respectively, for quarter ended June 30, 2026, against the minimum regulatory requirement of 100%. The bank has access to systemic liquidity through Reserve Bank of India's (RBI's) Liquidity Adjustment Facility (LAF) and Marginal Standing Facility (MSF) schemes.

Environment, social, and governance (ESG) risks

IFBL's service-oriented business model limits its direct exposure to environmental risks; however, indirect credit risks could arise if borrowers' operations are adversely impacted by climate-related events, environmental regulations, or transition risks. The bank has put in place a structured sustainability framework through a Board-approved ESG policy and has undertaken green financing and sustainable banking initiatives, reflecting its commitment towards responsible business practices.

Social risks for IFBL primarily stem from cybersecurity threats, customer data privacy breaches, service disruptions, and potential mis-selling practices, which could adversely impact the bank's reputation and regulatory compliance. The bank supports women entrepreneurship through lending to 68 lakh+ active women borrowers and undertakes Corporate Social Responsibility (CSR) and community development initiatives. While ~47% of the portfolio is aligned with responsible financing segments, the bank's focus on inclusion-oriented lending must be balanced against asset quality considerations, particularly borrower creditworthiness, economic vulnerabilities, and regulatory risks in certain segments, such as microfinance.

IFBL benefits from a well-established governance framework supported by an experienced board and robust policy architecture. In June 2026, 70% of the Board comprised independent directors, including two women directors. The bank has constituted a dedicated Board-level CSR and ESG Committee to oversee sustainability strategy and implementation, supported by board-approved ESG, Greenhouse Gas (GHG), and Green Deposit policies.

About the company and industry

Industry classification

Macroeconomic indicator	Sector	Industry	Basic industry
Financial services	Financial services	Banks	Private sector bank

IFBL was incorporated in October 2015, and the bank's name underwent a change from 'IDFC Bank Limited' (IBL) to 'IDFC First Bank Limited' as on January 12, 2019, following the merger of CFL with the bank. The merger of Capital First Limited and its two subsidiaries with IDFC Bank Limited became effective from December 18, 2018. IDFC Financial Holding Company Limited and IDFC Limited were merged into IFBL effective from October 01, 2024. IFBL's operations are across its three business verticals: corporate banking, consumer banking, and rural banking. As on June 30, 2026, it has a network of 1,155 branches across the country. IFBL is led by Managing Director and Chief Executive Officer (MD-CEO), V Vaidyanathan, who has over 25 years of banking experience. RBI has granted its approval for re-appointment of V Vaidyanathan as the bank's MD-CEO for three years from December 19, 2024, to December 18, 2027.

Disclaimer:

This disclaimer pertains to the ratings issued and content published by CARE Ratings Limited ("CareEdge Ratings"). Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. Any opinions expressed herein are in good faith and are subject to change without notice. The rating reflects the opinions as on the date of the rating. A rating does not convey suitability or price for the investor. The rating agency does not conduct an audit on the rated entity or an independent verification of any information it receives and/or relies on for the rating exercise. CareEdge Ratings has based its ratings/outlook on the information obtained from reliable and credible sources. CareEdge Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. The users of the rating should rely on their own judgment and may take professional advice while using the rating in any way. CareEdge Ratings shall not be liable for any losses that user may incur or any financial liability whatsoever to the user of the rating. The use or access of the rating does not create a client relationship between CareEdge Ratings and the user.

CAREEDGE RATINGS DISCLAIMS WARRANTY OF ANY KIND, EXPRESS, IMPLIED OR OTHER WARRANTIES OR CONDITIONS, TO THE EXTENT PERMITTED BY APPLICABLE LAWS, INCLUDING WARRANTIES OF MERCHANTABILITY, ACCURACY, COMPLETENESS, ERROR-FREE, NON-INFRINGEMENT, NON-INTERRUPTION, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE OR INTENDED USAGE.

Most entities whose bank facilities/instruments are rated by CareEdge Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CareEdge Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. CareEdge Ratings does not act as a fiduciary by providing the rating. The ratings are intended for use only within the jurisdiction of India. The ratings of CareEdge Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades. CareEdge Ratings has established policies and procedures as required under applicable laws and regulations which are available on its website.
