Rationale and key rating drivers

CARE Ratings Limited (CareEdge Ratings) has reaffirmed Avanse Financial Services Limited's (Avanse's) ratings at 'CARE AA-; Stable' (non-convertible debentures [NCDs], long-term bank facilities and subordinate debt). Ratings continue to derive strength from Avanse's established position as the second-largest specialised non-banking financial company (NBFC) in India's overseas education loan segment, its strong growth in scale (assets under management [AUM] compounded annual growth rate [CAGR] of 48.34% from FY22–FY26), asset quality profile while currently comfortable, emerging stress in the portfolio would remain a key monitorable. Ratings also factor in healthy capitalisation through regular capital infusions by marquee investors, such as Warburg Pincus, IFC, Kedaara Capital, and Mubadala. Avanse had raised ₹1,200 crore in FY26, through a rights issue through compulsory convertible preference shares (CCPS) from its existing shareholders.

Tangible net worth (TNW) stood at ₹6,148 crore as on June 30, 2026 (March 31, 2026: ₹5,999 crore; March 31, 2025: ₹4,104 crore), with AUM/TNW at 3.87x (March 31, 2026: 3.90x; March 31, 2025: 4.63x) and overall capital adequacy ratio (CAR) at 26.84% (March 31, 2026: 26.73%; March 31, 2025: 22.44%). Profitability metrics remain adequate, with annualised return on total assets (ROTA) at 2.48% in Q1FY27 (FY26: 2.71%; FY25: 3.03%)

However, ratings remain constrained by Avanse's continued tilt towards specialised overseas education lending, inherent asset-liability tenure mismatch arising from long-contracted tenure of education loans, and moderate seasoning of the book. This is despite the company having demonstrably broadened its product mix within the education-financing ecosystem. As on June 30, 2026, student loans – international (SLI) constituted 77.77% of AUM (FY26: 78.14%; FY25: 80.46%), with the balance spread across education institution loans (EIL: Q1FY27: 17.30%; FY26: 17.48%; FY25: 16.16%), domestic education loans (Q1FY27: 2.06%; FY26: 1.84%), loan against property (LAP) (Q1FY27: 1.32%; FY26: 0.80%; fully secured and introduced in FY26), and

[1]SEBI: Securities and Exchange Board of India; RBI: Reserve Bank of India; MCA: Ministry of Corporate Affairs; IRDAI: Insurance Regulatory and Development Authority of India; PFRDA: Pension Fund Regulatory and Development Authority.

[2]Complete definitions of ratings assigned are available at www.careratings.com and in other CARE Ratings Limited's publications.

cross-sell/others (Q1FY27: 1.49%; FY26: 1.66%). Around 42.87% of overall AUM is now equated monthly instalment (EMI) paying, providing meaningful cash-flow diversification against the SLI moratorium structure. Avanse accordingly remains the most product-diversified franchise among specialised education NBFCs in India.

CareEdge Ratings has withdrawn the rating assigned to the NCD issue of Avanse with immediate effect, as the company has repaid these issuances in full and there is no amount outstanding under the instruments as on date. For proposed NCD and Subordinate bond issuances, the withdrawal has been undertaken at the request of the company. This action is in accordance with CareEdge Ratings' Policy on withdrawal of ratings.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors:

- Significant increase in scale of operations with stable asset quality on a sustained basis.
- Improving financial performance with ROTA of 3.00% or above on a sustained basis.

Negative factors:

- Significant deterioration in asset quality with gross non-performing asset (GNPA) above 3.00% on a sustained basis.
- AUM/TNW beyond 5.50x.
- Weakening in profitability metrics with ROTA below 1.50% on a sustained basis.

Analytical approach: Standalone
CareEdge Ratings has analysed standalone business and financial profile of Avanse.

Outlook: Stable
Stable outlook reflects CareEdge Ratings' expectation that Avanse will maintain healthy asset quality and adequate profitability metrics while continuing to increase its scale of operations supported by the strengthened capital base raised in FY26, and continued investor backing.

Detailed description of key rating drivers

Key strengths

Established market position in overseas education loans segment, diversification underway
Avanse remains among the two largest specialised NBFCs in the Indian overseas education loan segment. AUM further grew to ₹23,814 crore as on June 30, 2026 (FY26: ₹23,411 crore; FY25: ₹18,985 crore;), registering y-o-y growth of 19.05% in Q1FY27. Of the total AUM, student loans–international (SLI) constituted ₹18,520 crore, representing 77.77% of AUM (FY26: ₹18,293 crore, 78.14%; FY25: 80.46%), while education institution loans (EIL) stood at ₹4,120 crore, representing 17.30% of AUM (FY26: ₹4,093 crore, 17.48%; FY25: 16.16%). Domestic education loans increased to ₹490 crore, representing 2.06% of AUM (FY26: ₹432 crore, 1.84%; FY25:1.68%), while the LAP portfolio increased to ₹313 crore, representing 1.32% of AUM (FY26: ₹188 crore, 0.80%), others and cross sell stood at ₹355 crore at 1.49% (FY26: ₹389 crore, 1.66%; FY25:1.56%), reflecting the company's calibrated diversification within its core education-financing franchise. in Q1FY27, overall disbursements stood at ₹1,552 crore, comprising SLI disbursements of ₹834 crore (53.73%), EIL disbursements of ₹501 crore (32.24%), domestic and digital education loan disbursements of ₹164 crore (10.55%), LAP disbursements of ₹47 crore (3.03%) and other disbursements of ₹7 crore (FY26: ₹7,019 crore, ₹4,334 crore, ₹2,051 crore, ₹433 crore, ₹114 crore and ₹86 crore, respectively).
The company predominantly finances Science, Technology, Engineering, and Mathematics (STEM) courses, which constitute 68.21% of the SLI portfolio as on March 31, 2026, complemented by a calibrated non-STEM book that includes high-employability management, healthcare, business and design programmes.

Sourcing is well-diversified across education counsellors and aggregators, direct sales agents (DSAs), and direct digital acquisition. CareEdge Ratings notes that the company's specialised underwriting framework, which evaluates student profile, course employability, university tier, country tier, and co-borrower credentials, remains a key driver of its competitive position in this niche segment.

Capitalisation levels strengthened by equity infusion
As on March 31, 2026, Avanse's capitalisation profile remained comfortable, with TNW increasing materially to ₹5,999 crore (FY25: ₹4,104 crore), supported by fresh equity infusion of ₹1,200 crore and internal accruals. Consequently, the company reported CAR of 26.73% (FY25: 22.44%) and Tier-I CAR of 26.08% (FY25: 21.78%), remaining well above the regulatory requirements

of 15% and 10%, respectively. as on June 30, 2026, TNW increased to ₹6,148 crore, while CAR and Tier-I CAR remained comfortable at 26.84% and 26.20%, respectively.
Reflecting the capital infusion, the debt-equity ratio improved to 3.08x as on March 31, 2026 (FY25: 3.53x), while AUM/TNW improved to 3.90x (FY25: 4.63x), providing meaningful headroom for further growth. As on June 30, 2026, the debt-equity ratio and AUM/TNW ratio further improved to 2.89x and 3.87x, respectively. CareEdge Ratings believes Avanse will continue to benefit from sustained access to capital, supported by the backing of marquee institutional investors.

Adequate profitability metrics
Avanse reported profit after taxation (PAT) of ₹598 crore in FY26 (FY25: ₹504 crore), translating into ROTA of 2.71% (FY25: 3.03%) and return on net worth (RONW) of 11.84% (FY25: 13.01%). Credit costs stood marginally higher at 0.53% in FY26, against 0.39% in FY25, considering seasoning of the portfolio. However, this currently continues to remain at comfortable levels, sustenance of which is monitorable. Over s, credit costs have been range bound between 0.40%-0.70%. There was a decline in fee and other income contribution to 1.61% (FY25: 2.00%), while overall spreads improved primarily due to lower borrowing cost. Operating leverage improved meaningfully, with opex/average total assets declining to 1.99% (FY25: 2.37%) and cost-to-income to 32.24% (FY25: 34.77%), reflecting the benefits of scale. With ~12.00% off book, direct assignment (DA) income contribution to profit before tax (PBT) remained meaningful at 17.82% (FY25: 13.47%).

In Q1FY27, Avanse reported PAT of ₹154 crore on total income of ₹762 crore. Annualised ROTA and RONW stood at 2.48% and 10.16%, respectively, while credit cost remained comfortable at 0.47%. Operating efficiency remained stable, with opex/average total assets at 1.81% and cost-to-income ratio at 32.30%. However, due to decline in yields, net income margin (NIM) moderated to 4.34%.

CareEdge Ratings will monitor the company's ability to maintain operating leverage gains while containing credit costs as the portfolio seasons.

Comfortable asset quality to remain monitorable
Avanse's asset quality remains comfortable for its category, although it has shown some moderation in line with the seasoning of the rapidly built book. Gross Stage 3 (GS3) stood at 0.36% as on March 31, 2026 (FY25: 0.26%) and Net Stage 3 at 0.06% (FY25: 0.04%). GS3 within the SLI segment stood at 0.27% (FY25: 0.10%), EIL at 0.37% (FY25: 0.84%), and domestic education at 1.73% (FY25:1.46%). GNPA from loans under EMI stood at 1.25% (FY25:0.78%; ~40.61% of overall AUM) and GNPA from loans under moratorium stands at 0.02%. The company continues to maintain strong collection efficiency at 99.09 %, supported by high prepayment rates. As on March 31, 2026, Static pool data indicates that the total 90+ days past due (DPD) remains below ~0.83% from Q12018. Country-wise, the 90+ DPD in the India book stood at 0.67% and Canada at 0.55% ran higher delinquency than the US and the UK, which stood at 0.27% and 0.33%, respectively.

As on June 30, 2026, the overall GS3 and NS3 ratios stood at 0.51% and 0.18%, respectively, with provision coverage of 66%. Segment-wise, GS3 stood at 0.39% for SLI, 0.60% for EIL, 1.50% for domestic education loans and 0.69% for LAP. Among the major geographies, India reported the highest 90+ DPD at 0.90%, followed by Canada at 0.69%, the US at 0.43% and the UK at 0.41%.

Overseas education loans' asset quality is largely driven by students' earnings potential. The asset quality risk is negated largely with the company adopting student-led approach in its lending practices with estimated earning potential of students derived through combination of student's academic track record, track record of university, employment opportunities of the course and the country. Continuous monitoring is carried out based on external environment, customer data, and bureau trends and analytics driven early warning signals, propensity to bounce models, and credit loss forecasting models, among others.

CareEdge Ratings notes the company structures loan repayments to ensure that at least a part or the full interest is paid in the study period, enabling continuous monitoring of asset quality. However, the two-year gestation period before graduation exposes borrowers to potential shifts in the job market, unemployment rates, and economic cycles, which could impact asset quality. Adverse changes in unemployment rates in key markets (such as, the US, the UK and Canada) or specific fields including STEM courses could affect the company's asset quality, which will be a point for monitoring.

Diversified resource profile
Avanse maintains a diversified liability mix. As on June 30, 2026, term loans constituted 59.37% of total borrowings (FY26: 56.71%; FY25: 58.24%), followed by external commercial borrowings (ECBs) at 26.25% (FY26: 25.60%; FY25: 15.91%), reflecting continued access to diversified offshore funding. NCDs constituted 8.89% (FY26: 16.45%), commercial papers 3.58%

(FY26: 0.78%), TREPS borrowings against government securities 1.47%, working capital borrowings 0.29% (FY26: 0.28%) and securitisation through pass-through certificates (PTCs) 0.14% (FY26: 0.18%).

The company has been focusing on increasing the proportion of DA, which helps in asset liability management (ALM), which is co-terminus to the life of the asset. In FY26, Avanse raised aggregate fresh funds of ₹7,108 crore, including ECB drawdowns of ~₹2,262 crore from multiple offshore lenders. While Avanse was benefitted from a lower cost of borrowing, supporting improved spreads, sustained increase in borrowing costs going forward could pressure margins and will be a key monitorable.

Key weaknesses

Product and geographical concentration risk

Avanse focuses primarily on financing overseas education, exposing it to sector concentration risk. Decline in demand for overseas education loans, which has been observed recently or weakening employability could potentially impact the company's disbursal levels, and hence, its profitability. These loans experience seasonal demand linked to admission cycles at institutions. While the company has the most diversified portfolio in the education-financing space (overseas, institution loans, domestic education, LAP, cross-sell), the dominance of SLI remains with 77.77% of overall AUM (FY26: 78.14%; FY25: 80.46%).

Geographically, the top four countries continued to account for 92.18% of AUM as on June 30, 2026 (FY26: 92.69%; FY25: 94.41%). The destination mix continued to shift, with the UK's share increasing to 35.52% of AUM (FY26: 34.41%; FY25: 27.41%) and constituting 45.67% of the SLI portfolio, making it the largest geography. The US's share moderated to 27.61% (FY26: 29.27%; FY25: 37.90%), reflecting visa and employment-related uncertainties in the country. India's share increased to 22.23% (FY26: 21.86%; FY25: 19.54%), while Canada's share moderated to 6.83% (FY26: 7.14%; FY25: 9.56%) owing to local and geopolitical factors.

This pivot towards the UK reduces single-country concentration but introduces monitorable around the UK post-study work visa policy, currency dynamics and graduate employability in destination labour markets. Diversification into Germany, Ireland, Australia, Italy and France has progressed gradually, with their combined share rising to 7.50% of AUM (FY26: 7.07%). The company's ability to sustainably manage destination-mix volatility while preserving asset quality will remain a key rating monitorable.

High percentage of moratorium in overseas loans leading to limited seasoning

Despite Avanse commencing operations in January 2013, significant scale-up was achieved only from FY22 onwards, AUM has clocked a CAGR of 48.34% from FY22–FY26 (₹4,836 crore to ₹23,411 crore). Overseas education loans typically carry a contracted tenure of ~10-15 years, with a principal moratorium covering the study period followed by a one-year grace period. As on June 30, 2026, the EMI-paying SLI book stood at 27.46% of SLI AUM against 25.80% as on March 31, 2026, a meaningful step-up in seasoning. Including the fully EMI-paying domestic and institutional segments, the overall EMI share of AUM rose to 42.87%. Majority SLI moratorium book is scheduled to convert to EMI in FY27 itself (ex-fresh disbursement), leading to EMI book at ~60%. This is the key monitorable analytical window in the next 18–24 months.

Approximately 57.13% of overall AUM remains under principal moratorium and ~72.54% of SLI is yet to commence repayment, indicating limited seasoning across vintages. Comfort is drawn from (i) the high observed prepayment rate (₹2,432 crore in FY26, which shortens behavioural tenure to 6–7 years against contracted 10 years, (ii) mandatory co-borrower structure for SLI, and (iii) ~22.72% of the loan book being secured in FY26.

Inherent asset liability tenure mismatch arising due to longer tenure of education loans

Avanse's ALM profile remains exposed to inherent asset-liability tenure mismatches, given the longer tenure of education loans extended by the company. The risk is partially mitigated by higher prepayments, as the actual behavioural tenure of higher education loans is shorter at 6-7 years, compared to the contracted tenure of ~10 years.

Post the infusion of ₹1,200 crore, the ALM statement as on June 30, 2026, reflects positive cumulative mismatches across all buckets. Inflows from advances for the next 12 months stood at ₹5,555 crore (post prepayment assumption), against borrowings of ₹6,216 crore in the same period. Liquidity is supported by regular equity infusions from promoters and investors and undrawn sanctions of ₹956 crore.

However, as the infused liquidity is deployed towards incremental disbursements, structural mismatches could re-emerge. Avanse's ability to maintain a matched ALM profile on a sustained basis through diversification of funding sources, lengthening borrowing tenure, and prudent liquidity buffer maintenance will remain a key rating monitorable.

Liquidity: Adequate

As on June 30, 2026, Avanse's asset liability management (ALM) had positive cumulative mismatches across all buckets (excluding the off-balance sheet exposures). The company had free cash and cash equivalents and liquid investments of ₹2,877 crore and an undrawn sanction lines of ₹956 crore. As a prudent measure, the company maintains cash and bank balance of minimum two months of net cash outflows including disbursements. Against the cash and cash equivalents in hand and the inflows from advances totalling ₹4,754 crore (post prepayment assumption), the company had debt obligations of ₹4,223 crore in the next six months.

About us:

Established in 1993, CareEdge Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the Reserve Bank of India. With an equitable position in the Indian capital market, CareEdge Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CareEdge Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CareEdge Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit. Disclaimer:

This disclaimer pertains to the ratings issued and content published by CARE Ratings Limited ("CareEdge Ratings"). Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. Any opinions expressed herein are in good faith and are subject to change without notice. The rating reflects the opinions as on the date of the rating. A rating does not convey suitability or price for the investor. The rating agency does not conduct an audit on the rated entity or an independent verification of any information it receives and/or relies on for the rating exercise. CareEdge Ratings has based its ratings/outlook on the information obtained from reliable and credible sources. CareEdge Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. The users of the rating should rely on their own judgment and may take professional advice while using the rating in any way. CareEdge Ratings shall not be liable for any losses that user may incur or any financial liability whatsoever to the user of the rating. The use or access of the rating does not create a client relationship between CareEdge Ratings and the user.

CAREEDGE RATINGS DISCLAIMS WARRANTY OF ANY KIND, EXPRESS, IMPLIED OR OTHER WARRANTIES OR CONDITIONS, TO THE EXTENT PERMITTED BY APPLICABLE LAWS, INCLUDING WARRANTIES OF MERCHANTABILITY, ACCURACY, COMPLETENESS, ERROR-FREE, NON-INFRINGEMENT, NON-INTERRUPTION, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE OR INTENDED USAGE.

Most entities whose bank facilities/instruments are rated by CareEdge Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CareEdge Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. CareEdge Ratings does not act as a fiduciary by providing the rating. The ratings are intended for use only within the jurisdiction of India. The ratings of CareEdge Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades. CareEdge Ratings has established policies and procedures as required under applicable laws and regulations which are available on its website.
