Vivriti Capital Limited: Ratings upgraded for PTCs backed by unsecured personal loan receivables securitisation transaction

Summary of rating action

Trust name	Instrument*	Initial rated amount (Rs. crore)	Amount O/s after last surveillance (Rs. crore)	Current rated amount (Rs. crore)	Rating action	Financial sector regulator [#]
Hemera 06 2025	Series A1 PTCs	42.32	NA	4.79	[ICRA]AA(SO); upgraded from [ICRA]AA-(SO)	RBI
	Series A2 PTCs	2.43	NA	2.43	[ICRA]A+(SO); upgraded from [ICRA]A(SO)	RBI

*Instrument details are provided in Annexure I

[#] The Securities and Exchange Board of India's (SEBI) grievance redressal/dispute resolution and SEBI investor protection mechanisms such as SEBI Complaint Redress System (SCORES) and Online Dispute Resolution (ODR) shall not be available for activities and instruments that fall under the regulatory purview of financial sector regulators other than SEBI

Rationale

The pass-through certificates (PTCs) are backed by unsecured personal loan receivables originated by Vivriti Capital Limited (VCL/Originator). VCL would be the servicer for the transaction.

The ratings upgrade factors in the build-up of the credit enhancement cover over the future PTCs payouts on account of high pool amortisation. The ratings also draw comfort from the fact that the breakeven collection efficiency is lower than the actual collection levels observed in the pool till the August 2026 payout month.

Pool performance summary

Parameter	Hemera 06 2025
Payout month	August 2026
Months post securitisation	14
Pool amortisation	77.32%
Series A1 PTCs amortisation	88.69%
Series A2 PTCs amortisation	0.00%
Cumulative collection efficiency ¹	96.15%
Cumulative prepayment rate	23.32%
Loss-cum-0+ days past due (dpd) ²	4.72%
Loss-cum-30+ dpd ³	4.30%
Loss-cum-60+ dpd ⁴	3.93%
Loss-cum-90+ dpd ⁵	3.48%
Series A1 PTCs Breakeven collection efficiency (BECC) ⁶	20.28%
Series A2 PTCs Breakeven collection efficiency (BECC) ⁷	41.75%

¹ Cumulative collections including advances/ (Cumulative billings + Opening overdue at the time of securitisation)

² Principal outstanding on contracts aged 0+ dpd/Principal outstanding on the pool at the time of securitisation

³ Principal outstanding on contracts aged 30+ dpd/Principal outstanding on the pool at the time of securitisation

⁴ Principal outstanding on contracts aged 60+ dpd/Principal outstanding on the pool at the time of securitisation

⁵ Principal outstanding on contracts aged 90+ dpd/Principal outstanding on the pool at the time of securitisation

⁶ (Balance cash flows payable to Series A1 PTCs investor – CC available)/Balance pool cash flows

⁷ (Balance cash flows payable to Series A1 PTCs + Series A2 PTCs investor – CC available)/Balance pool cash flows

Parameter	Hemera 06 2025
Payout month	August 2026
Excess interest spread (EIS; % of balance pool) for PTC Series A1 PTCs ⁸	8.48%
Excess interest spread (EIS; % of balance pool) for PTC Series A2 PTCs ⁹	7.05%
Principal subordination (% of balance pool principal) for Series A1 PTCs	56.63%
Principal subordination (% of balance pool principal) for Series A2 PTCs	34.59%
CC available (as % of balance pool principal)	22.04%
Cumulative cash collateral (CC) utilisation	0.00%

Transaction structure

As per the transaction structure, till Series A1 PTCs are outstanding, the monthly cash flow schedule comprises the promised interest payout to these PTCs. Series A1 PTCs principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Interest payout to Series A2 PTCs is also to be made on expected basis. Following the full redemption of Series A1 PTCs, the monthly cash flow schedule will comprise the promised interest payout to Series A2 PTCs. Series A2 PTCs principal is then expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date.

Any prepayment in the pool would be used for the prepayment of Series A1 PTCs principal, followed by Series A2 PTCs principal. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. However, on the occurrence of any predefined trigger events, the entire residual EIS every month shall be utilised for accelerating the principal payment due to Series A1 PTCs until they are fully redeemed and to Series A2 PTCs thereafter. The key trigger will be if the portfolio at risk (PAR) >60 in the pool exceeds 5.00% of the initial pool principal.

Key rating drivers and their description

Credit strengths

Substantial credit enhancement available in the structure – The ratings factor in the build-up in the credit enhancement with CC increasing to ~22% of the balance pool principal. Internal credit support is also available through EIS and subordination in the transaction.

Healthy performance of pool – The pool's performance has been healthy with a cumulative collection efficiency of ~96% till the August 2026 payout month. This has resulted in moderate delinquencies with the 90+ dpd at ~3.5% after the August 2026 payout month. Additionally, the pool is highly amortised at 77.32%. Further, there have been no instances of CC utilisation in the pool till date owing to the strong collection performance and the presence of EIS in the transaction.

Track record of co-lending operations – VCL has a record of over four years of co-lending in the unsecured personal loans category. It has adequate underwriting policies and collection procedures across a wide geography. The company has sufficient processes for servicing the loan accounts in the securitised pool. Collections are made entirely in the digital mode, which significantly reduces the commingling risk with the co-lending partners.

Credit challenges

Risks associated with lending business – The pool's performance would remain exposed to macroeconomic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make

⁸ (Closing Pool interest – Closing Interest to Series A1 PTCs investors)/Closing Pool principal outstanding

⁹ (Closing Pool interest – Closing Interest to Series A1 PTCs investors - Closing Interest to Series A2 PTCs investors)/Closing Pool principal outstanding

timely repayments of their loans. The pool is exposed to the inherent credit risk associated with the unsecured nature of the asset class and the relatively lower recoveries from delinquent contracts.

High geographical concentration – The pool has high geographical concentration with the top 3 states, viz. Maharashtra, Tamil Nadu and Uttar Pradesh, contributing ~34% to the initial pool principal. Its performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 5.50% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 4.8% to 18.0% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final ratings for the instruments.

Details of key counterparties

The key counterparties in the rated transaction are as follows:

Transaction name	Hemera 06 2025
Originator	Vivriti Capital Limited
Servicer	
Trustee	IDBI Trusteeship Services Limited
Cash collateral holding bank	DCB Bank
Collection and payout account bank	ICICI Bank

Liquidity position: Superior

The liquidity for Series A1 and A2 PTCs is superior after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be more than 10 times the estimated loss in the pool.

Rating sensitivities

Positive factors – The ratings could be upgraded on the strong collection performance of the underlying pool (monthly collection efficiency >95%) on a sustained basis, leading to the build-up of the credit enhancement cover for the remaining payouts.

Negative factors – Pressure on the ratings could emerge on the sustained weak collection performance of the underlying pool (monthly collection efficiency of <90%), leading to higher-than-expected delinquency levels and credit enhancement utilisation. Weakening in the credit profile of the servicer (VCL) could also exert pressure on the ratings.

Analytical approach

The rating action is based on the performance of the pool till July 2026 (collection month), the present delinquency levels as well as the credit enhancement available in the pool, and the performance expected over the balance tenure of the pool.

About the originator

Pursuant to the composite scheme of arrangement between HCIMPL, erstwhile VCL (eVCL), VNL, eVAM and VFPL, which became effective from April 1, 2026, eVCL's NBFC business was transferred to HCIMPL. HCIMPL was renamed Vivriti Capital Limited (VCL), effective June 13, 2026, and VFPL was renamed Vivriti Asset Management Private Limited (VAM) effective May 11, 2026.

VCL was a registered non-deposit taking systemically important non-banking financial company (NBFC-ND-SI), promoted by Mr. Vineet Sukumar and Mr. Gaurav Kumar in June 2017. It provided diverse debt financing solutions including loans, working capital finance and trade finance to NBFCs and other enterprises across sectors including manufacturing, infrastructure and financial services. It also expanded its presence in the retail segment through various co-lending partnerships with other NBFCs.

eVCL reported a net profit of Rs. 264 crore in FY2026, on a standalone basis, on total managed assets of Rs. 13,162 crore while it reported a net profit of Rs. 220 crore on total managed assets of Rs. 10,868 crore in FY2025.

Key financial indicators (Audited, Ind-AS)*

	FY2024	FY2025	FY2026

Complexity level of the rated instrument

Trust name	Instrument	Complexity indicator
Hemera 06 2025	Series A1 PTCs	Highly Complex
	Series A2 PTCs	Highly Complex

The Complexity Indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: [Click here](#)
