Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

Reaffirmation and assignment of ratings to bank facilities and non-convertible debentures (NCDs) of Kaleidofin Capital Private Limited (KCPL) continue to draw strength from its technology-based credit scoring model, ki score, owned by the parent company, Kaleidofin Private Limited (KPL). Ratings also derive comfort from experienced board and management team, and adequate capitalisation. As on March 31, 2026, KCPL's assets under management (AUM) stood at ₹316.30 crore, reflecting a strong growth of ~74.8% year-on-year (March 31, 2025: ₹181 crore) and a sequential growth of modest 6.25% with AUM reaching to ₹336.05 crore as on June 30, 2026.

Ratings remain continue to remain constrained by moderate track record and small scale of operations, weak profitability (on a consolidated basis) led by higher operating expenses and exposure to riskier borrower profile. Asset quality deteriorated materially, with GNPA and NNPA increasing to 8.57% and 8.39%, respectively, as on March 31, 2026, from 1.68% and 1.51% as on March 31, 2025. Although the increase was partly attributable to restructured accounts, the sharp rise underscores heightened asset-quality risks. The asset quality improved in Q1FY27, with GNPA moderating to 4.77%. However, factoring in the aforementioned restructured wholesale accounts, overall stress in the loan book remains elevated. Net stressed assets (defined as net non-performing assets plus restructured assets) stood at 5.40% of the loan book and 11.18% of tangible net worth as on June 30, 2026.

Non-convertible debentures (NCDs) with ISIN INE13HX07024 have been withdrawn basis full repayment, as confirmed by the issuer, which is in line with the withdrawal policy of CARE Ratings Limited (CareEdge Ratings).

Rating sensitivities: Factors likely to lead to rating actions

Positive factors: Factors that could individually or collectively lead to positive rating action/upgrade:

- Significant mobilisation of equity capital for further growth in business.
- Sustained growth in the loan portfolio while improving asset quality.
- Improvement in the profitability with return on total assets (ROTA) above 1.5% on a sustained basis.
- Significant improvement in the borrowing profile.

Negative factors: Factors that could individually or collectively lead to negative rating action/downgrade:

- Continued consolidated losses or slower than envisaged improvement in profitability.
- Overall gearing exceeding 3x.
- Increase in net stressed assets to tangible net worth beyond 17% on a sustained basis.
- Deterioration in the asset quality with Gross non-performing assets GNPA (%) above 5%

¹SEBI: Securities and Exchange Board of India; RBI: Reserve Bank of India; MCA: Ministry of Corporate Affairs; IRDAI: Insurance Regulatory and Development Authority of India; PFRDA: Pension Fund Regulatory and Development Authority

²Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE Ratings Limited's publications.

Analytical approach: Consolidated

CARE Ratings Ltd. (CareEdge Ratings) has taken a consolidated view of KPL for assessing KCPL's business and financial position. Ratings also factor in the technology support that KCPL receives from the parent in the form of tech-based credit scoring model. Entities considered for consolidation are listed under Annexure 5.

Outlook: Stable

The "Stable" outlook factors in experienced management team, adequate capitalisation, and the ability to raise equity capital on need basis with an expectation of company turning profitable in FY27.

Detailed description of key rating drivers:**Key strengths****Technology-based credit scoring model, ki score**

KCPL uses KPL-owned ki score and ki view for credit underwriting and portfolio-risk assessment. ki view provides borrower- and pool-level analytics to identify risk trends and evaluate portfolio performance. ki score is a supervised machine-learning model that assesses borrower creditworthiness using bureau, repayment, application and geographic data. ki score range from 1 to 100, with lower scores indicating better credit profiles.

As per company management, in seven years, since its inception, the platform ki score has underwritten more than USD 10 billion and serviced more than 12.5 million customers. with satisfactory collection track record. As the model continues to be utilised, its efficiency and accuracy are expected to improve, addressing gaps in the credit underwriting market. Going forward, performance of the credit underwriting model will remain a key monitorable.

Adequate capitalisation supported by capital infusion

KPL commenced operations in FY18 with seed funding from its promoters, Puneet Gupta (Co-founder and Chief Executive Officer [CEO], KCPL) and Sucharita Mukerjee (Co-founder and CEO, KPL). Since inception, the company consistently raised equity from private equity and venture capital investors, aggregating ~₹323 crore to date. This includes ₹153 crore infused in FY25 by institutional investors, such as Rabo Partnerships, the Michael and Susan Dell Foundation, Flourish Ventures Fund, Oikocredit, and the IDH Farmfit Fund.

The consolidated tangible net worth (TNW) declined to ₹160.73 crore as on March 31, 2026, from ₹175.21 crore as on March 31, 2025, primarily due to continued losses, and remained broadly stable at ₹160.86 crore as on June 30, 2026. With borrowing funded growth in AUM, overall gearing increased to 1.27x as on March 31, 2026, from 0.57x in FY25, and further to 1.69x as on June 30, 2026.

At the KCPL level, CAR stood comfortable at 34% as on June 30, 2026, supported by downstream capital from KPL.

CareEdge Ratings expects the company to continue scaling its operations while prudently managing leverage and maintaining overall gearing below 3x in the medium term.

Experienced board and management team

As on March 31, 2026, KPL's board consists of nine directors, including two executive directors, one non-executive director, two independent directors, and four nominee directors. The company is led by Sucharita Mukherjee, Managing Director and CEO, who brings over 24 years of experience. Her prior roles include leading credit derivatives origination and structuring at Morgan Stanley in London, working in the credit derivatives team at Deutsche Bank, and serving as the founding CEO of Northern Arc Capital and Chairperson of Northern Arc Investments. KCPL, the group's non-banking financial company (NBFC) subsidiary, is headed by Puneet Gupta, who also has over 24 years of experience. He co-founded the IFMR group (now Northern Arc Capital and Dvara Group) and previously served as Group Chief Finance Officer (CFO) of IFMR Holdings. Earlier, he was part of the founding team for the microfinance business at ICICI Bank. The senior leadership is supported by an experienced management team overseeing the company's business functions.

Key weaknesses**Sustained losses led by higher operating expenses**

Given the early stage of operations and elevated operating expenses, KPL's consolidated profitability remains weak. The company reported a net loss of ₹16.25 crore on total income of ₹63.58 crore in FY26, which stood significantly higher than its earlier expectations. The cost-to-income ratio improved to 128.83% in FY26 from 185.48% in FY25 but remained elevated. In Q1FY27, KPL reported a loss of ₹2.58 crore on total income of ₹21.47 crore, while the cost-to-income ratio moderated further to 106.99%. Despite the improving trend, the company continues to report operating losses, with the path to profitability remaining slower than initially envisaged. The company's ability to

achieve sustainable break-even in FY27 while containing operating expenses and credit costs amid portfolio growth will remain a key rating monitorable.

KCPL remained profitable on a standalone basis, with PAT increasing to ₹0.52 crore in FY26 from ₹0.18 crore in FY25, alongside a 34% increase in total income to ₹44.54 crore. It reported PAT of ₹0.22 crore on total income of ₹17.15 crore in Q1FY27. However, profitability remains modest relative to the scale of operations.

CareEdge Ratings notes that the profitability is expected to improve on a consolidated basis as the company scales up and operating leverage kicks in.

Moderate track record and small scale of operations

The parent entity, KPL was established in July 2017, while KCPL was incorporated in March 2021 and commenced lending operations in FY23. As a result, both entities remain at a relatively early stage of operations with a moderate track record. KCPL operates a branchless, partner-driven lending model, sourcing customers through originator partners. As on June 30, 2026, the company had ~32 such partners.

Going forward, KCPL's ability to scale operations while maintaining asset quality and profitability will remain a key rating monitorable.

Weakening of asset quality and exposure to riskier borrower profile

KCPL caters to individual borrowers and nano and micro enterprises, which typically have relatively weaker credit profiles. The portfolio's retail share has increased to 72.59% of AUM as on June 30, 2026, including pass-through certificates (PTC) exposures, while wholesale exposures constituted 27.41%.

Asset quality deteriorated materially in FY26, with GNPA increasing to 8.57% from 1.68% in FY25. The deterioration was driven by stress in a few legacy retail partner portfolios amid broader sectoral headwinds and the year-end classification of certain wholesale exposures as NPAs. Some wholesale borrowers had sought restructuring before crossing 90+ days past due (dpd); however, as the restructuring was formally executed subsequently, the auditors considered the execution date for classification. These restructured accounts are currently regular, with no overdue payments. Another wholesale exposure was classified as an NPA due to a short operational delay in the realisation of funds around year-end. Even after excluding these classification-related wholesale exposures, GNPA would have remained elevated at ~4.8%, indicating underlying asset-quality stress in the portfolio.

Accordingly, the increase in reported GNPA was sharper than the movement in underlying delinquencies, with the 90+ DPD ratio increasing moderately to 3.58% in FY26 from 1.91% in FY25. Notably, asset quality improved in Q1FY27, with GNPA moderating to 4.77%. However, factoring in the aforementioned restructured wholesale accounts, overall stress in the loan book remains elevated. Net stressed assets (defined as NNPA plus restructured assets) stood at 5.40% of the loan book and 11.18% of tangible net worth.

CareEdge Ratings also notes that asset quality remains supported by the ~5% first loss default guarantee (FLDG) provided by originator partners. Given the recent growth in disbursements and an average loan tenure of around two years, portfolio seasoning remains moderate. The loan book's performance across economic cycles is yet to be established and will remain a key rating monitorable.

Liquidity: Adequate

KCPL's liquidity profile stands adequate with positive cumulative mismatches in all timeframe buckets per the asset liability management (ALM) statement as on June 30, 2026. KCPL has liquidity of ₹58.00 crore as on June 30, 2026, in the form of cash, bank balance, which is sufficient for debt repayment obligation for the next three months.

Ratings assigned by CareEdge Ratings do not factor in rating-related trigger clauses per terms of facilities/instruments, which may involve acceleration of payments in case of rating downgrade.

About the company and industry

Industry classification

Macroeconomic indicator	Sector	Industry	Basic industry
Financial services	Financial services	Finance	Non-banking financial company (NBFC)

Kaleidofin Capital Private Limited (KCPL)

KCPL is a Non-Banking Financial Company (NBFC) incorporated on March 19, 2021. As of March 31, 2026, 100% of KCPL's shareholding was held by its parent company, Kaleidofin Private Ltd (KPL). The primary products offered by KCPL include agricultural and allied loans, women entrepreneur loans, micro-entrepreneur loans (MEL), and small business loans. KCPL collaborates with select NBFCs to facilitate origination, ensuring a granular portfolio. The entire asset under management of the company is originated through co-lending and business correspondence structure with select NBFC partners.

As of June 30, 2026, the assets under management stood at ₹333 crore, and the company's tangible net worth (TNW) stood at ₹126 crore.

Kaleidofin Private Limited (KPL)

KPL is the parent company of KCPL, holding 100% shareholding in KCPL. KPL owns and operates a technology-based credit underwriting model driven by the ki score and ki view. The ki score, derived from a supervised AI/ML model, enhances decision-making by integrating ensemble data modelling and data sources. KPL collaborates with financial institutions, including NBFCs and banks, to provide superior credit underwriting through the ki score and ki view. Services offered by KPL encompass risk infrastructure for customer acquisition, customer management, and risk management. Data sources utilised for generating ki scores include credit bureau data, transaction data, behavioural information (such as saving behaviour), demographic data (including loan application data, house, and farm holdings), among others. The ki view tool facilitates data visualisation and analysis, aiding in understanding customer behaviour patterns concerning collections. The ki view tool tracks the entire customer lifecycle, leveraging dynamic data rather than static, point-in-time data.
