Rationale and key rating drivers

CARE Ratings Limited (CareEdge Ratings) has reaffirmed long-term credit quality ratings (CQRs) to Bandhan Banking and PSU Debt Fund (formerly known as Bandhan Banking and PSU Fund), Bandhan Corporate Bond Fund, Bandhan Ultra Short to Short Term Fund (formerly known as Bandhan Low Duration Fund, Bandhan Money Market Fund, and short-term CQR to Bandhan Overnight Fund and Bandhan CRISIL-IBX Financial Services 3-6 Months Debt Index Fund. These funds are managed by Bandhan AMC Limited (Bandhan AMC).

Schemes rated 'CARE AAA mfs' are considered to have the highest degree of safety regarding timely receipt of payments from investments that have been made.

Schemes rated 'CARE A1+mfs' are considered to have very strong degree of safety regarding timely payment receipt from investments that have been made.

CareEdge Ratings' fund CQR is an opinion on overall credit quality of a debt mutual fund scheme or debt exchange traded funds (ETFs). CareEdge Ratings' Fund CQR is not a recommendation to purchase, sell, or hold a security/fund. They comment neither on current market price, suitability for a particular investor, nor on prospective fund performance appreciation, net asset value (NAV) volatility, or fund yield. Ratings do not address the fund's ability to meet payment obligations to investors.

Ratings are not an opinion on fund management practices (including fund structure, expense ratios, and marketing activities), financial performance, and management quality of an asset management company (AMC), and hence do not comment on business practices. Ratings are also not indicative of compliance and reputation risks, liquidity, market, and sectoral risks.

[2]Complete definitions of the ratings assigned are available at www.careratings.com and in other CARE Ratings Limited's publications.

Ratings capture the fund's overall exposure to default risk based on credit quality of individual securities in the portfolio. CareEdge Ratings' Fund CQR is based on evaluation of the fund's stated investment strategy and portfolio credit risk. It involves evaluation of credit quality of individual securities and diversification of the portfolio. CareEdge Ratings uses the concept of credit scores assigned to individual securities, per credit scoring matrix developed by it.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors: Factors that could individually or collectively lead to positive rating actions/upgrade:

- Not applicable

Negative factors: Factors that could individually or collectively lead to negative rating actions/downgrade:

- CareEdge Ratings could downgrade ratings of schemes if credit quality of underlying securities deteriorates, resulting in a breach in the threshold limit set by CareEdge Ratings for a given rating level.

Analytical approach:

Assessment of underlying credit quality of debt schemes.

Detailed description of key rating drivers

The credit score of these rated schemes has been calculated based on portfolio outstanding as on August 31, 2026, and are within the benchmark set by CareEdge Ratings. CareEdge Ratings reviews a mutual fund scheme on an on-going basis to support its published rating opinions. Fund portfolio is reviewed monthly. Detailed annual review of the fund is also undertaken. The fund must maintain the fund credit score within the benchmark fund score associated with a given rating level. If in a particular month, the fund credit score breaches the benchmark, CareEdge Ratings generally provides a curing of one month to the AMC to correct the situation and realign the score.
