November 09, 2026

Vivriti Capital Limited: Provisional ratings assigned to PTCs backed by unsecured personal and MSME loan receivables (originated under co-lending partnerships) issued by Tuberose 10 2026

Summary of rating action

Trust name	Instrument*	Current rated amount (Rs. crore)	Rating action	Financial Sector Regulator#
Tuberose 10 2026	Series A1 PTC	78.87	Provisional [ICRA]AA-(SO); assigned	RBI
	Series A2 PTC	4.53	Provisional [ICRA]A-(SO); assigned	

**Instrument details are provided in Annexure I*

#The Securities and Exchange Board of India's (SEBI) grievance redressal/dispute resolution and SEBI investor protection mechanisms such as SCORES and ODR shall not be available for activities and instruments that fall under the regulatory purview of financial sector regulators (FSRs) other than SEBI

Rating in the absence of pending actions/documents	No rating would have been assigned as it would not be meaningful

Rationale

The pass-through certificates (PTCs) are backed by a pool of unsecured personal and micro, small and medium enterprise (MSME) loan receivables originated by Vivriti Capital Limited {VCL/Originator; rated [ICRA]A+ (Stable)[1]} through co-lending partnerships. The pool has an aggregate principal outstanding of Rs. 90.65 crore (pool receivables of Rs. 113.05 crore). VCL will also be the servicer for the transaction.

The provisional ratings are based on the strength of the cash flows from the selected pool of contracts, the credit enhancement available in the structure as well as the integrity of the legal structure. The ratings are subject to the fulfilment of all the conditions under the structure and ICRA's review of the documentation pertaining to the transaction.

Transaction structure

As per the transaction structure, till Series A1 PTC is outstanding, the monthly cash flow schedule comprises the promised interest payout to Series A1 PTC. The Series A1 PTC principal is expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. Interest payout to Series A2 PTC is also to be made on expected basis. Following the full redemption of Series A1 PTC, the monthly cash flow schedule will comprise the promised interest payout to Series A2 PTC. The Series A2 PTC principal is then expected to be paid on a monthly basis (100% of the pool principal billed) but is promised on the final maturity date. The final maturity date for Series A1 and A2 PTCs is March 12, 2031.

Any prepayment in the pool would be used for the prepayment of the Series A1 PTC principal, followed by the Series A2 PTC principal. Any surplus excess interest spread (EIS), after meeting the promised and expected payouts, will flow back to the Originator on a monthly basis. However, on the occurrence of any predefined trigger events such as the PAR 90 of the pool exceeding 5.00% of the initial pool principal, the entire residual EIS every month shall be utilised for accelerating the principal payment due to Series A1 PTC until it is fully redeemed. Thereafter, the EIS shall be utilized to make principal payments to the Series A2 PTC investors till the Series A2 PTC are fully redeemed.

[1] *The current rating rationale of the Originator, available at this link, provides its detailed rating history and rating transitions*

The credit enhancement available in the structure is in the form of (i) a cash collateral (CC) of 5.00% of the initial pool principal, amounting to Rs. 4.53 crore, to be provided by the Originator, (ii) subordination of 13.00% of the initial pool principal for Series A1 PTC and 8.00% of the initial pool principal for Series A2 PTC, and (iii) the EIS of 16.55% and 15.07% of the initial pool principal for Series A1 and A2 PTC, respectively.

Key rating drivers and their description

Credit strengths

Granular pool supported by presence of credit enhancement – The pool is granular, consisting of 6,790 contracts, with top 10 obligors forming only 0.51% of the pool principal, thereby reducing the exposure to any single borrower. Further, the credit enhancement available in the form of CC and EIS would absorb some of the losses in the pool and provide support in meeting the PTC payouts.

Seasoned contracts in the pool with no overdues – The pool has a weighted average seasoning of ~6 months with no delinquent contracts as on the cut-off date. Further, all of the contracts in the pool have never been delinquent, thereby reflecting the borrowers' relatively better credit profile which is a credit positive.

Track record of co-lending operations – Vivriti has a record of over four years of co-lending in the unsecured personal loans category. The partners have adequate underwriting policies and collection procedures across a wide geography. The company has adequate processes for servicing the loan accounts in the securitised pools. The collections are carried out entirely in the digital mode which significantly reduces the comingling risk with the co-lending partners.

Credit challenges

Moderate geographical concentration – The pool has moderate geographical concentration with the top three states, viz. Maharashtra, Karnataka and Telangana contributing ~44% to the initial pool principal. The pool's performance would thus be exposed to any state-wide disruption that may occur due to natural calamities, political events, etc.

Risks associated with lending business – The pool's performance would remain exposed to macro-economic shocks, business disruptions and natural calamities that may impact the income-generating capability of the borrowers and their ability to make timely repayments of their loans. The pool is exposed to the inherent credit risk associated with the unsecured nature of the asset class and that recovery from delinquent contracts tends to be lower.

Key rating assumptions

ICRA's cash flow modelling for rating securitisation transactions involves the simulation of potential losses, delinquencies and prepayments in the pool. The losses and prepayments are assumed to follow a log-normal distribution. The assumptions for the losses and the coefficient of variation are considered on the basis of the values observed from the analysis of the past performance of the Originator's loan portfolio as well as the characteristics of the specific pool being evaluated. The resulting collections from the pool, after incorporating the impact of the losses and prepayments, are accounted for in ICRA's cash flow model, in accordance with the cash flow waterfall of the transaction.

For the current pool, ICRA has estimated the shortfall in the pool principal collection during its tenure at 6.00% with certain variability around it. The average prepayment rate for the underlying pool is modelled in the range of 4.8% to 18% per annum. Various possible scenarios have been simulated at stressed loss levels and prepayment rates and the incidences of default to the investor as well as the extent of losses are measured after factoring in the credit enhancement to arrive at the final ratings for the instruments.

Liquidity position: Strong

The liquidity for Series A1 PTC and Series A2 PTC is strong after factoring in the credit enhancement available to meet the promised payout to the investor. The total credit enhancement would be ~4.50 times and ~3.50 times the estimated loss in the pool for Series A1 PTC and Series A2 PTC, respectively.

Rating sensitivities

Positive factors – The ratings could be upgraded on the strong collection performance of the underlying pool (monthly collection efficiency >95%) on a sustained basis, leading to the build-up of the credit enhancement cover for the remaining payouts.

Negative factors – Pressure on the ratings could emerge on the sustained weak collection performance of the underlying pool (monthly collection efficiency of <90%), leading to higher-than-expected delinquency levels and credit enhancement utilisation levels. Weakening in the credit profile of the servicer (VCL) could also exert pressure on the ratings.

Analytical approach

The rating action is based on the analysis of the performance of VCL's unsecured personal loan and MSME portfolio with its co-lending partners till June 2026, the key characteristics and composition of the current pool, the performance expected over the balance tenure of the pool, and the credit enhancement cover available in the transaction.

Consolidation/Standalone	Not applicable

Pending actions/documents required to be completed for conversion of the provisional rating into final

The assigned ratings are provisional and would be converted into final upon the execution of:

1. Trust Deed
2. Deed of Assignment
3. Power of Attorney
4. Accounts Agreement
5. Legal Opinion
6. Trustee Letter
7. Other key or important documents executed for the transaction

Validity of the provisional rating

The Trust is expected to complete the pending actions/execute the pending documents in the near term. However, in case of continued pendency of the actions/documents beyond one year of this publication, the provisional rating would be withdrawn for the transaction even if the instrument has been issued.

Risks associated with the provisional rating

In case the issuance is completed, but the pending actions/documents are not completed for the transaction within one year (validity period) from the assignment of the rating, the provisional rating will be withdrawn in accordance with ICRA's Policy on Provisional Ratings available at www.icra.in.

About the originator

Pursuant to the composite scheme of arrangement between Hari & Company Investments Madras Private Limited (HCIMPL), VCL, Vivriti Next Limited (VNL), Vivriti Asset Management Private Limited (VAM) and Vivriti Funds Private Limited (VFPL), which became effective from April 1, 2026, VCL's non-banking financial company (NBFC) business was transferred to HCIMPL. HCIMPL was renamed Vivriti Capital Limited on June 13, 2026.

VCL was a registered non-deposit taking systemically important NBFC (NBFC-ND-SI), promoted by Mr. Vineet Sukumar and Mr. Gaurav Kumar in June 2017. It provided diverse debt financing solutions including loans, working capital finance and trade finance to NBFCs and other enterprises across sectors including manufacturing, infrastructure and financial services. It also expanded its presence in the retail segment through various co-lending partnerships with other NBFCs.

VCL reported a net profit of Rs. 264 crore (standalone basis) in FY2026 on total managed assets of Rs. 13,162 crore while it reported a net profit of Rs. 220 crore on total managed assets of Rs. 10,868 crore in FY2025.

Complexity level of the rated instrument

Instrument	Complexity indicator
Series A1 PTC	Highly Complex
Series A2 PTC	Highly Complex

The Complexity indicator refers to the ease with which the returns associated with the rated instrument could be estimated. It does not indicate the risk related to the timely payments on the instrument, which is rather indicated by the instrument's credit rating. It also does not indicate the complexity associated with analysing an entity's financial, business, industry risks or complexity related to the structural, transactional or legal aspects. Details on the complexity levels of the instruments are available on ICRA's website: Click here
