Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

Reaffirmation of ratings to bank facilities and commercial paper (CP) of HDFC Securities Limited (HSL) considers strong franchise with its status as the sixth-largest retail stockbroker in terms of active client base as on June 30, 2026, its comfortable capitalisation, and healthy earnings profile. Ratings continue to derive strength from HSL's strong parentage, with HDFC Bank Limited (HBL- rated 'CARE AAA; Stable/ CARE A1+') holding 93.99% (As on June 30, 2026) stake in HSL, and expectation of continued need-based support from HBL. Ratings also factor in HSL's strategic importance to the group as it provides access to a broader suite of capital market and investment products to the bank's customers. Ratings also consider managerial and operational linkages with the parent and broader benefits, including strong financial flexibility, and shared brand identity and client base.

However, ratings also factor in risks inherent in broking business due to high dependence on capital markets, resulting in volatility in income and profitability, increasing competition in the sector, and susceptibility towards regulatory changes. With the rising share of margin trading facility (MTF) in the revenue mix, overall indebtedness, and associated asset quality also remain key monitorable.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors: Factors that could individually or collectively lead to positive rating action/upgrade:

- Not applicable.

Negative factors: Factors that could individually or collectively lead to negative rating action/downgrade:

- Weakening in the credit profile of HBL.
- Dilution of parent support philosophy or linkages with HBL or significant change in shareholding of HBL in HSL.
- Material impact on the profitability and/or deterioration in asset quality of MTF book of the company.

Analytical approach: Standalone

CARE Ratings Limited (CareEdge Ratings) has analysed HSL's standalone credit profile, and has factored in linkages with its parent, HBL, owing to its strong operational and managerial linkages and shared brand name.

Outlook: Stable

The stable outlook factors in the expectation that HSL will continue to have a healthy and diversified earnings profile, considering its strong retail broking franchise while maintaining comfortable capitalisation levels.

Detailed description of key rating drivers

Key strengths

Strong parentage and expected support from HBL

HBL is the largest private sector bank in India designated as a Domestic Systemically Important Bank (D-SIB) and holds 93.99% stake in HSL as on June 30, 2026. HSL benefits from the sharing of HDFC brand and linkages in the form of access to established customer base and franchise of the bank, and business synergies, which allows the HDFC group to offer a full bouquet of financial

¹SEBI: Securities and Exchange Board of India; RBI: Reserve Bank of India; MCA: Ministry of Corporate Affairs; IRDAI: Insurance Regulatory and Development Authority of India; PFRDA: Pension Fund Regulatory and Development Authority.

²Complete definitions of ratings assigned are available at www.careratings.com and in other CARE Ratings Limited's publications.

services. HSL benefits from the widespread presence of HBL across the nation with diverse clientele, which helps HSL in getting leads for its business. Over 85-90% of the company's customers are HBL's customers.

HSL has Board representation from HBL, where Arvind Vohra (Country Head of Retail Assets at HDFC Bank) is HBL's Nominee Director. Several personnel serving in key roles at HSL have been previously associated with HBL. Dhiraj Relli, serving as the Managing Director and Chief Executive Officer (CEO), has worked as a Senior Executive Vice President and Head of Branch banking at HBL.

From an operational perspective, HBL's scale, widespread network, and the group's overall diverse clientele aid HSL in lead generation for its broking business. Likewise, HSL's broking customers serve in further strengthening the bank's retail liability franchise. Given these significant managerial and operational linkages, name and brand sharing and a financially strong parent, CareEdge Ratings expects HBL to extend need-based support to HSL.

Strong retail broking franchise

HSL is ranked sixth in terms of active clients (~10.05 lakh clients as on July 31, 2026). It offers broking services across equity and derivatives market segments for retail and institutional clients and distributes third-party products, such as mutual funds, insurance policies, fixed deposits, and initial public offers (IPOs), among others. With these, the company also provides MTF, a short-term loan to customers, which stood at ₹10,081 crore as on June 30, 2026.

In line with the industry trend toward digitalisation and a greater focus on digital offerings, the company streamlined its distribution network by consolidating branches, reducing the count to 127 as on June 30, 2026, from 184 as on March 31, 2024, with ~95% of total brokerage in Q1FY27, coming from retail clients.

The company has its own discount broking application "HDFC Sky", through which the company is targeting new-age investors. Seamless integration with HBL and benefits of common branding will continue to play a key role in growing and managing the overall broking franchise.

Healthy earnings profile, despite recent moderation in broking business

In FY26, the company reported a total income of ₹3,110 crore and a profit after tax (PAT) of ₹930 crore, translating into a PAT margin of 29.90% and a return on total assets (ROTA) of 5.22%. In Q1FY27, the company reported a PAT of ₹297 crore, with a PAT margin and annualised ROTA of 31.27% and 6.01%, respectively.

HSL's income is primarily derived from brokerage and fee income, and interest income on its MTF book, which contributed 48% and 31%, respectively, of total income in FY26. The company's total income witnessed moderation in FY26 over FY25 due to decline in brokerage income, considering unfavourable market conditions. Brokerage income has grown in Q1FY27, on a year-over-year (y-o-y) basis due to improvement in trading volumes. Given that brokerage income is entirely capital market dependent, HSL has sought to diversify its revenue base by generating fee income from cross-selling financial products and interest income from MTF loans.

Interest income rose slightly to ₹1,498 crore in FY26 from ₹1,418 crore in FY25, primarily considering increased margin requirements and investment income, despite subdued MTF growth. However, the MTF book increased sharply to ₹10,081 crore as of June 2026 from ₹7,133 crore as of March 2026 (₹5,512 crore as of March 2025). Alongside moderation in ROTA and a reduction in gearing, the return on net worth (RONW) also declined, though it remained healthy at 27.54% in FY26, down from 43.28% in FY25 and 51.63% in FY24. RONW improved to 34.0% in Q1FY27, mainly due to improvement in the market volumes. CareEdge Ratings expects profitability, particularly RONW, to improve in the coming quarters, contingent on market conditions, with MTF-linked interest income continuing to support diversification and growth.

Comfortable capital position

The company's tangible net worth (TNW) increased gradually to ₹3,647 crore as on June 30, 2026, from ₹3,496 crore as on March 31, 2026 (₹3,257 crore as on March 31, 2025), despite healthy earnings, considering sizeable dividend payouts.

Until FY20, fund-based borrowings were primarily utilised to meet exchange obligations arising from the broking business. Since FY20, these borrowings have also been deployed to fund the MTF portfolio, leading to growth in borrowings in line with the expansion of the MTF book, which stood at ₹10,081 crore as on June 30, 2026. In addition to fund-based borrowings, the company avails bank guarantees to meet margin requirements with exchanges.

Overall gearing increased to 4.64x as on March 31, 2026, from 2.65x as on March 31, 2025, and further to 5.28x as on June 30, 2026, considering increased margin requirements, investments, and growth in MTF book. Nearly 86% of the total fund-based

borrowings were in the form of CP as on June 30, 2026, and March 31, 2026 (97% as on June 30, 2025). As part of the HDFC Group, the company has been able to raise CP at competitive rates with a tenor of three months predominantly. The company also maintains access to bank lines to meet working capital requirements.

The company intends to maintain fund-based gearing of below 5x, aligned with its strategy to expand the MTF portfolio, subject to the regulatory cap on leverage. CareEdge Ratings derives comfort from HSL's financial flexibility as a subsidiary of HDFC Bank, which provides access to diversified funding sources at competitive rates.

Key weaknesses

Presence in inherently volatile and competitive broking business

HSL's earnings profile significantly depend on capital market activity and trading volumes, which are inherently volatile. Brokerage income accounted for 33% of the total income in FY26, while income from the MTF portfolio contributed 31%, which is directly a function of the market performance. As HSL expands its MTF book to support its growth, it exposes the company to credit and market risk as adverse deviation in valuation of underlying securities can significantly affect the HSLs risk profile. Hence, the ability to grow MTF book while maintaining adequate capitalisation buffer and healthy asset quality shall continue to remain a key monitorable. Income from distribution of third-party products, such as mutual funds, insurance, bonds, fixed deposits, and IPOs provides diversification to the overall revenue base.

The company continues to face competitive pressures in the brokerage industry, with low-cost and zero-brokerage firms gaining market share. However, with continued support from its parent bank, HSL has been able to retain its customer base and sustain operations in a highly competitive environment. In addition to diversifying revenues, the company remains focused on strengthening client relationships and continues to provide traditional (offline) and digital investment services. Given these competitive dynamics, the company's ability to enhance its market share and profitability remains a key monitorable.

Susceptibility to regulatory changes

The capital market industry witnessed continuous regulatory revisions. To further enhance transparency levels and limit misuse, Securities and Exchange Board of India (SEBI) introduced a few regulations in the last few years. In October 2024, SEBI introduced multiple measures to curb retail participation, which became effective in a phase-wise manner between November 2024 and April 2025. These measures include reduction in derivatives with weekly expiry, which was highest Futures & Options (F&O) contributor, increase in lot size and increase in extreme loss margin by 2% on short options contracts on their expiry day. Other measures included upfront collection of option premiums and removal of Calendar Spread Treatment on expiry day.

Through its amended directions dated February 13, 2026 (effective July 01, 2026), the Reserve Bank of India (RBI) introduced a comprehensive framework governing bank credit to capital market intermediaries, including stockbrokers. Revised norms mandate fully collateralised lending, prescribe higher collateral quality (with significant cash components), and impose minimum haircuts, particularly on equity securities. The bank funding for proprietary trading has been restricted, while margin trading facilities are required to be backed by high-quality liquid collateral. The framework also brings such exposures under stricter monitoring and concentration limits. These measures are expected to increase funding costs and necessitate stronger capitalisation and liquidity management across brokers to varying levels.

CareEdge Ratings will continue to monitor HSL's ability to adapt technology, systems, and risk management processes in response to the constantly evolving regulatory landscape without adverse impact on its overall business profile

Liquidity: Strong

As on June 30, 2026, the company had a total fund-based borrowings of ₹18,286 crore which included CP of ₹15,765 crore, Treps borrowings of ₹2,183 crore and loan against deposits of ₹338 crores. Against these, it maintained an unencumbered cash and cash equivalent of ₹422 crore and unutilised sanctioned lines of credit of ₹2,698 crore. The company's MTF book is a short-term book, and the inflows from this book are also utilised to meet debt obligations. HSL also maintains excess margins with exchanges that can be deployed in case of exigencies. The company benefits from strong financial flexibility as a subsidiary of HBL

About the company and industry

Industry classification

Macroeconomic indicator	Sector	Industry	Basic industry
Financial services	Financial services	Capital markets	Stockbroking and allied

HSL was incorporated in April 2000 as a joint venture of HBL, HDFC Limited, and Indocean Securities Holdings Limited. It is engaged in a single line of business as a provider of broking services to its clients in the capital market. The company is a public limited company listed in debt market in Bombay Stock Exchange (BSE). HBL has been gradually increasing its stake in HSL. It obtained a controlling interest of 55% in HSL in FY06, and as on June 30, 2026, the bank's overall shareholding in HSL stood at 93.99%. The company is registered as a "Stockbroker" with SEBI and as a "Corporate Agent" with the Insurance Regulatory and Development Authority (IRDA). The company started with equity trading and later rolled out derivatives trading. Currently, it offers a broad suite of savings and investment products and core broking product. It also distributes third-party products and plays a key role in cross-selling products of its group companies. In FY19, HSL started offering MTF, as part of which the company extends short-term loans to its broking customers fully secured against cash and/ or collateral of approved securities.

About us:

Established in 1993, CareEdge Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the Reserve Bank of India. With an equitable position in the Indian capital market, CareEdge Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CareEdge Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CareEdge Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit. Disclaimer:

This disclaimer pertains to the ratings issued and content published by CARE Ratings Limited ("CareEdge Ratings"). Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. Any opinions expressed herein are in good faith and are subject to change without notice. The rating reflects the opinions as on the date of the rating. A rating does not convey suitability or price for the investor. The rating agency does not conduct an audit on the rated entity or an independent verification of any information it receives and/or relies on for the rating exercise. CareEdge Ratings has based its ratings/outlook on the information obtained from reliable and credible sources. CareEdge Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. The users of the rating should rely on their own judgment and may take professional advice while using the rating in any way. CareEdge Ratings shall not be liable for any losses that user may incur or any financial liability whatsoever to the user of the rating. The use or access of the rating does not create a client relationship between CareEdge Ratings and the user.

CAREEDGE RATINGS DISCLAIMS WARRANTY OF ANY KIND, EXPRESS, IMPLIED OR OTHER WARRANTIES OR CONDITIONS, TO THE EXTENT PERMITTED BY APPLICABLE LAWS, INCLUDING WARRANTIES OF MERCHANTABILITY, ACCURACY, COMPLETENESS, ERROR-FREE, NON-INFRINGEMENT, NON-INTERRUPTION, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE OR INTENDED USAGE.

Most entities whose bank facilities/instruments are rated by CareEdge Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CareEdge Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. CareEdge Ratings does not act as a fiduciary by providing the rating. The ratings are intended for use only within the jurisdiction of India. The ratings of CareEdge Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades. CareEdge Ratings has established policies and procedures as required under applicable laws and regulations which are available on its website.
