[&]As of May 2026 payouts.

Rationale and key rating drivers

CARE Ratings Limited (CareEdge Ratings) had assigned the rating of 'Provisional CARE AA- (SO)' [pronounced as 'Double A Minus (Structured Obligation)'] to the Series A1 PTCs, issued by Rigel 03 2026, backed by a pool of microfinance loan receivables originated by Spandana Sphoorty Financial Limited (SSFL).

The rating is now confirmed and 'CARE AA- (SO)' [pronounced as 'Double A Minus (Structured Obligation)'] has been assigned to Series A1 PTCs.

The rating was final based on the following documents submitted to the satisfaction of CareEdge Ratings:

- Deed of assignment
- Trust deed
- Power of attorney
- Information memorandum
- Legal opinion from an independent legal counsel
- KYC audit report.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors - Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Delinquencies (90+ days past due [DPD] as percentage of initial principal outstanding [POS]) of less than 2% and the sustained high collection efficiency (cumulative collection efficiency of over 98%).
- Sustained build-up of cash collateral (CC) of over 2x the initial proposed (as a percentage of the balance POS).

Negative factors - Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Delinquencies (90+ DPD as percentage of initial POS) of over 8% and the sustained lower collection efficiency (cumulative collection efficiency of less than 90%).
- Utilisation of CC.
- Deterioration in the credit profile of the originator.
- Non-adherence to key transaction terms envisaged at the time of the rating.

Analytical approach

The final rating is based on conformity of the executed transaction documents with the proposed structure of the transaction. The rating also factors inter alia, analysis of the underlying pool of receivables, expected performance of the pool, performance of originator's portfolio, and transaction structure including the proposed credit enhancement.

Detailed description of key rating drivers

The rating assigned is finalised based on the structure provided to CareEdge Ratings by SSFL, the originator. The rating has been confirmed after copies of legal documents executed in accordance with the structure, a due-diligence audit report by an external auditor, and an independent legal opinion was furnished by the originator (SSFL), to the satisfaction of CareEdge Ratings.

¹Complete definition of the ratings assigned are available at www.careratings.com and other CARE Ratings Limited's publications

After May 2026 payout, the pool has amortised by ~10% in two months post-securitisation. Overdue (OD) (as a percentage of initial pool POS) is 0.06% with cumulative collection efficiency (CCE) of ~99.5% and nil utilisation of CC.

Key strengths:

- The robustness of transaction structure and well-defined payment mechanism.
- Credit enhancement comprising CC, subordinated over collateral (OC), and excess interest spread (EIS).
- No overdue contracts as on the pool cut-off date; all contracts are ever current as on the pool cut-off date;
- Underwriting policies and collection capabilities of SSFL.
- Moderate weighted average seasoning (based on EMI's paid) of ~5 months as of pool cut-off date.

Key weakness:

- Weak borrower profile as this segment is susceptible to socio-political interference and other external shocks.

Liquidity: Strong

The inherent liquidity in the structure is strong. The interest payouts for Series A1 PTCs are promised monthly, while the principal of Series A1 PTCs is promised to be paid by final legal maturity. In case of delinquency, the payouts are expected to be supported by credit enhancement consisting of CC, principal subordination in the form of OC and EIS.

Key rating assumptions and adequacy of credit enhancement

CareEdge Ratings has analysed the transaction to assess whether the CE is sufficient to cover the shortfalls. Since the transaction is sensitive to the credit quality of the underlying pool, CareEdge Ratings has analysed the monthly performance of pool, performance of static pools provided by the originator and the overall portfolio performance of the originator. Considering the borrower profile, nature of the loan, pool characteristics, and portfolio performance, CareEdge Ratings has taken the average shortfall at 7.00%-9.00% of the POS. The base case shortfalls were stressed along with other key factors, such as the timing of shortfalls, recovery assumptions, and the time to recovery. The pool cash flow has been further adjusted for prepayments of underlying loans, assuming a monthly prepayment in the range of 0.50%-1.00%. CareEdge Ratings has stipulated credit enhancement which is commensurate with credit rating of the pass-through certificates (PTCs).

Key risks, concerns, and mitigants:

The securitisation transaction involves several risks, including credit risk from borrower defaults, commingling risk due to time lags in fund deposits, prepayment risk from early principal repayments, servicer bankruptcy risk, legal risk regarding the validity of receivable transfers, and counterparty risk involving transaction parties. These risks are factored while assigning rating, wherever needed, and partially mitigated through credit enhancements, separate record-keeping, credit rating/profile of the originator, transaction structuring, true sale of receivables, legal opinion from independent legal counsel. The transaction structure also has provision to change counterparties, such as trustee and banker among others.

Key terms of Servicer Contract:

The servicing agreement has covered role of the originator as the Collection and Payment Agent (CPA) for the special purpose vehicle (SPV) in managing collections from underlying borrowers, who have consented to such assignment through provisions incorporated in the respective loan agreements. The Servicer (originator) follows its standard procedures for collections, including recovery actions, and ensures timely transfers of funds to the SPV under an M+1 payment structure. The trustee monitors the sufficiency of funds for investor payouts one day prior to payout date and utilises CC in case of shortfall. The Servicer is also submitting detailed reports on billing, collections (including prepayment), overdue amounts with aging thereof, cash flow schedules to the trustee and such other information as may be required by the trustee. The terms of the agreement have provisions for the appointment of an alternate servicer in case of servicer event of default.
