Rationale and key rating drivers

CARE Ratings Limited (CARE Ratings) had assigned the rating of 'Provisional CARE AA (SO)' [pronounced as 'Double A (Structured Obligation)'] to the Series A1 PTCs, issued by Orbit 02 2024, backed by a pool of microfinance loan receivables originated by Spandana Sphoorty Financial Limited (SSFL).

The rating is now confirmed and 'CARE AA (SO)' [pronounced as 'Double A (Structured Obligation)'] has been assigned to Series A1 PTCs.

Furthermore, the above rating was final based on the below-mentioned documents submitted to the satisfaction of CARE Ratings:

- Account Agreement
- Assignment Agreement
- Servicing Agreement
- Trust Deed
- Power of Attorney
- Information Memorandum
- Legal opinion from an independent legal counsel
- KYC Audit Report.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors - Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Delinquencies (90+ DPD as % of initial POS) of <2% coupled with the sustained high collection efficiency (cumulative collection efficiency of >98%).
- Build-up of cash collateral of more than 2x the initial proposed (as a percentage of the balance principal outstanding [POS]).

Negative factors - Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Delinquencies (90+ DPD as % of initial POS) of >5% coupled with the sustained lower collection efficiency (cumulative collection efficiency of <90%).
- Sharp deterioration in the credit profile of the originator.
- Non-adherence to key transaction terms envisaged at the time of the rating.

Analytical approach

The final rating is based on conformity of the executed transaction documents with the proposed structure of the transaction. The rating also factors inter alia, the analysis of the underlying pool of receivables, the expected performance of the pool, performance of originator's portfolio and transaction structure including the proposed credit enhancement.

Detailed description of the key rating drivers

The rating assigned is finalised based on the structure provided to CARE Ratings by SSFL, the originator. The rating has been confirmed after copies of the legal documents executed in accordance with the structure, a due-diligence audit report by an external auditor, and an independent legal opinion was furnished by the originator (SSFL), to the satisfaction of CARE Ratings.

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

Key strengths:

- The robustness of transaction structure and well-defined payment mechanism.
- Credit enhancement comprising cash collateral, subordinated over collateral and EIS.
- No overdue contracts as on the pool cut-off date; all contracts are ever current as on the pool cut-off date.
- Underwriting policies and collection capabilities of SSFL.
- High weighted average seasoning (based on EMIs paid) of around 7 months with amortisation of around 23% of initial pool.

Key weakness:

- Weak borrower profile as this segment is susceptible to socio-political interference and other external shocks.

Liquidity: Strong

The inherent liquidity in the structure is strong. The interest payouts for Series A1 PTCs are promised on a monthly basis, while the principal of Series A1 PTCs is promised to be paid by final legal maturity. In case of any delinquency, the payouts are expected to be supported by credit enhancement consisting of cash collateral, principal subordination in the form of over collateral, and EIS.

Key rating assumptions

CARE Ratings has analysed the transaction to assess whether the CE is sufficient to cover the shortfalls. Since the transaction is sensitive to the credit quality of the underlying pool, CARE Ratings has analysed the performance of static pools provided by the originator and the overall portfolio performance of the originator. Considering the borrower profile, nature of the loan, pool characteristics, and portfolio performance, CARE Ratings has taken the average shortfall at 10.00-12.00% of the principal outstanding. The base case shortfalls were stressed along with other key factors, such as the timing of shortfalls, the recovery assumptions, and the time to recovery. The pool cash flow has been further adjusted for prepayments of underlying loans, assuming a monthly prepayments in the range of 0.50%-1.00%.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
