Rationale and key rating drivers

CARE Ratings Limited (CARE Ratings) has revised the rating of the Series A1 PTC issued by Lotus 08 2023, backed by microfinance loans receivables originated by Spandana Sphoorty Financial Limited (SSFL), at 'CARE AA (SO)' (pronounced as Double A [Structured Obligation]).

Revision in ratings is primarily based on performance of the underlying loans in the last 12 months post-securitisation, robust legal structure, well-defined payment mechanism, significant build-up in cash collateral (CC) and over collateral (OC) – as a percentage of the balance amount of pass-through certificates (PTCs), subordination of excess interest spread (EIS), servicing capability and SSFL's overall performance.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors - Factors that could, individually or collectively, lead to positive rating action/upgrade:

- Delinquencies (90+ days past due [DPD]) of <2% coupled with the sustained high collection efficiency (cumulative collection efficiency of >98%).
- Build-up of CC of over 4x the initial proposed (CC; as a percentage of the balance principal outstanding [POS]).

Negative factors - Factors that could, individually or collectively, lead to negative rating action/downgrade:

- Delinquencies (90+ DPD as a percentage of initial POS) of >5% and sustained lower collection efficiency (cumulative collection efficiency of <90%).
- Deteriorating credit profile of the originator.
- Utilisation of cash collateral.
- Non-adherence to key transaction terms envisaged at the time of rating.

Analytical approach

The rating action is based on inter alia, observed and expected performance of pool, presence of credit enhancement (CE) and adherence to the transaction structure.

Pool Performance:

The pool has amortised by 63.50% in 12 months post-securitisation, with nil utilisation of CC. The pool has exhibited moderate delinquencies. As on August 2024, overdue (OD) (as a percentage of the initial principal outstanding [POS]) is 1.08%. The credit enhancement (CE) available is sufficient to sustain the rating for balance tenure.

¹Complete definitions of the ratings assigned are available at www.careedge.in and in other CARE Ratings Ltd's publications

Pool summary (as of Aug-24 payout)	
Months post-securitisation	12
Pool amortisation	63.50%
30+ delinquency (percentage of the initial pool POS)	3.51%
90+ delinquency (percentage of the initial pool POS)	1.95%
Overdue amount (percentage of the initial pool POS)	1.08%
Cumulative Collection Efficiency [CCE]	98.38%
CC (percentage of the balance PTC POS)	26.93%
Cumulative prepayments	11.42%

Detailed description of key rating drivers

Key strengths:

- CC as a percentage of PTC POS is 26.93%, which remains unutilised, and OC, which is 40.39% of PTC POS.
- The pool has performed on expected lines for 12 months (post-securitisation) and has amortised 63.50%.
- Well-defined payment mechanism and adherence to the transaction structure.

Key weakness:

- Moderate delinquency with OD and 90+DPD of 1.08% and 1.95% (as a percentage of initial pool POS).
- Weak borrower profile, as this segment is susceptible to socio-political interference and other external shocks.

Liquidity: Strong

Inherent liquidity in the structure is strong. Interest payouts for Series A1 PTCs are promised monthly while the principal of Series A1 PTC is promised to be paid on or before the final legal maturity. The investors in Series A1 PTC may expect principal repayment monthly per the agreed waterfall mechanism. In case of delinquency, payouts are expected to be supported by CC (in the form of fixed deposits [FDs]), OC, and EIS.

Key rating assumptions

CARE Ratings has analysed the transaction to assess whether CE is sufficient to cover shortfalls. Since the transaction is sensitive to credit quality of the underlying pool, CARE Ratings has analysed performance of the pool and overall portfolio performance of the originator. Considering borrower profile and loan, pool characteristics and portfolio performance, CARE Ratings has taken the average shortfall from 7% to 9% of the principal outstanding. Base case shortfalls were stressed and other key factors such as timing of shortfalls, recovery assumptions, and time to recovery. CARE Ratings has found that CE provided is sufficient to cover shortfalls in a stress scenario commensurate with the assigned rating. The pool cash flow has been further adjusted for prepayments of underlying loans, assuming monthly prepayments in the range of 0.5%-1.00%.

About the company and industry

Industry classification

Macroeconomic indicator	Sector	Industry	Basic industry
Financial services	Financial services	Finance	Securitisation

SSFL is primarily engaged in extending microfinance loans through the joint liability group (JLG) model, primarily to borrowers belonging to low-income households. In 2003, the company was registered with the Reserve Bank of India (RBI) as a non-deposit taking non-banking finance company (NBFC-ND) and is currently registered under the new category of NBFC-microfinance institution (MFI). The company went into corporate debt restructuring (CDR) post Andhra Pradesh crisis in 2010 and exited CDR in April 2017.

SSFL was promoted by Padmaja Reddy, who holds ~15% stake in the company and is a member of the board but does not hold significant control. Other major stakeholders are Kedaara Capital and Affiliates (holding 58.19%), JM Financial Products Limited (holding 9.94%), and Valiant Mauritius Partners FDI Limited (holding 9.46%). The new CEO, Shalabh Saxena, and CFO, Ashish Damani, have come from Bharat Financial Inclusion Limited. The positions of CTO, CBO, and CXO were also thereafter filled by Kedaara Capital.

SSFL has a presence in 14 states with a total of 1,533 branches. The portfolio is moderately diversified; Madhya Pradesh constituted the maximum of 21.31% but the top four states constituted 76.06% of the portfolio. SSFL is focused on its micro-credit business and follows the JLG model for risk mitigation. SSFL's business is targeted towards under-privileged women.
